4 Eaves of hand rail @ $1.50	$6.00
7 Railing bolts @ 8¢	.56
67 Banisters @ 15¢	10.25
886 yds. Plastering @ 30¢	265.80
Painting	125.00
3000 bricks in Chimney @ 8¢	24.00
Lime and sand for said Chimneys	4.50
Building of Chimneys	12.00
2 Mantels @ $6	12.00
Spouting and flashing for Chimneys	30.00
The value of the material in the house, including the Carpenters work is —	$1394.42

7th. Int: In the first item of 8717 feet of frame mentioned by you; what does it contain?
Ans: It contains the joists, rafters, studding, posts, sills and plates.
8th. Int: What was the character of the material in said house? State all your knowledge herein.
Ans: It was common class material throughout. Hemlock is the commonest framing you can get — The weather boarding, in my judgment, was the lowest, commonest weatherboarding he could get, of German fluted weather-boarding. I put the flooring at second class yellow pine flooring, and was what we call No. 2.
9th. Int: Were the values given by you in your answer to the 6th. Interrogatory a fair value for the materials used in the construction of said house in that neighborhood?
Ans: Yes sir.
10th. Int: Did you measure the roof of said building?
Ans: No sir.
11th. Int: How did you ascertain that it took 6000 shingles to cover said building?
Ans: By the courses on the roof — I counted thirty four (34) courses in length and allowed two and one half (2½) shingles to the foot for the length of the eaves of the house, which made 1530 to one side and on the four (4) sides 6120 shingles.
12th. Int: Did you examine the quality of said Shingles? And if yes, what was the value of that quality of Shingles at the time the house was built?
Ans: I did. They were worth ten dollars ($10.) per thousand (M) I rate them at a good grade of No. 3. Shingles.
13th. Int: Did you count the windows in said house? If yes, how many windows were in said house?
Ans: I counted 18 windows in the house.
14th. Int: How many doors were there in said house?
Ans: Thirteen (13) Panel doors and ten (10) Batten doors.
15th. Int: What would be a fair price for the Panel doors you saw in said house?
Ans: Ten (10) at two dollars & seventy five cents ($2.75) and three (3) at three dollars and twenty five cents ($3.25).
