According to information provided by SHA, Bridge No. 21019 was constructed as a small ~~stone~~ stone arch bridge on the road between Frederick and Hagerstown that later became part of the National Road. In 1949 the bridge was widened by 8 feet with steel beams on each side and was encased in concrete. This work so altered the bridge that it no longer retains anything of the appearance of the original 19th century stone arch bridge. Bridge No. 21019 lacks the integrity necessary for individual listing. In addition, it is not located in any known district.
(There are no records for Bridge No 21019 prior to 1949 but it is assumed by SHA that it was constructed in the 19th century as a stone arch bridge.)

Documentation on the property/district is presented in: Project File
