A Statement to the Citizens of Baltimore By–

THE M. GOLDSEKER COMPANY

We are offering our qualified tenants first preference to take advantage of a wonderful opportunity now available through the FHA to buy their home.

This program makes available the opportunity for people who have little or no savings to become home owners without the usual necessity of a large down payment and large settlement expenses.

★ For those of our tenants who wish to buy, we are allowing them a portion of the rent we receive in order for them to accumulate the minimal money necessary to qualify for the FHA program. In addition – before submitting the house to the FHA, each home is examined by the M. Goldseker property inspectors and repairs and improvements are made.

The undeniable trend towards home ownership in this country is becoming a way of life for millions of Americans now, and will continue in the coming decades. The basic precept of home ownership has made a nation that today can boast nearly 70% of its families are living in their own homes.

In light of the current atmosphere promoting home ownership for the citizens of Baltimore and in light of the wonderful opportunity now afforded by the FHA for qualified people with little or no savings—and especially because of the favorable response to this plan—

We shall endeavor – as we have in the past – to provide decent housing to those persons desiring to upgrade themselves; and specifically, to offer renters with little or no savings the opportunity to become home owners, so they too may have their stake in the community!
