To Farmers!

"EXCELSIOR,"

1872. 1872.

Composed of 800 pounds of No. 1 Peruvian Guano 1200 pounds of Soluble Phosphate of Lime, (bones dissolved in sulphuric acid) Potash and soda.

Forming the most concentrated, universal and durable fertilizer ever offered to the farmer—combining all the stimulating qualities of Peruvian Guano, and the ever durable Fertilizing properties of Bones. Excelsior is in fine dry powder, prepared expressly for drilling, and can be applied in any quantity however small per acre and it is the opinion of many close calculating Farmers, after Fourteen years experience in testing it side by side with other popular fertilizers, that an application of 100 pounds of Excelsior is equal to from 200 to 300 pounds of any other fertilizer or guano offered for sale, therefore is fully 100 to 200 per cent. cheaper.

Look out for imitations and counterfeits. The popularity of Excelsior has induced *unscrupulous* parties in this and other cities to copy our trade mark, and resort to other *dishonorable* means to sell their *worthless* compounds.

Farmers should see that every Bag is branded as above, with the ANALYSIS and OUR NAME in RED LETTERS. All others are counterfeits.
