## Useful Information.

**A Hole in the Pocket.**

A great many men have a hole in the pocket, and so lose all the little change they put in it. And the worst of it is, they do not know it. If they did, they could mend up the hole and put an end to the loss. Every day they are minus a few dimes, and they wonder how they come so short. When the bills are to be paid, they cannot imagine how they come to be so short of change. At the end of the year, they are surprised to find so poor a footing up. They work hard, rack their brains on plans, and still they do not get ahead much. Bills accumulate, income diminishes, and still they do not discover the hole in the pocket.

One man has bad fences, gates, and barns. The cattle break through every now and then, and destroy crops, and he occupies time in driving them out. The pigs creep through the holes. The horses get away. The boys and men and servants and dogs are kept on the run after roguish cows and jumping horses and climbing hogs. The stock becomes uneasy, and does not thrive. The crops are injured. The fences are broken down. Time is consumed. The trouble is, that man has a hole in his pocket. One man has no sheds, nor barns, nor much injured and wasted. The grain is his — and the damp weather molds it. His potatoes rot. His pumpkins are destroyed. His — does him but little good. His tools are left out in the open weather. His — and rusted in and stunted for want of shelter. His trouble is a hole in his pocket, out of which slip all his profits, with much of the fruits of his hard labor.

One man has poor plows of the vile stamp of his ancestors. He cannot afford a modern plow. He does not believe in subsoiling. Draining is the notion of scientific fools. Drills are a hoax. Deep plowing would spoil the land. So he plows and sows as his grandfather did on the worn-out soil of his venerable ancestors. He has a hole in his pocket, and will have it till he wakes up to the importance of good tools and good sense of himself and soil.

One man does not take a paper; cannot afford it; has no time to read; does not believe in book farming; likes the old ways best; denies all the stories he has heard from rumor about large cattle and crops and profits; does not believe in new notions. For forty years he has planted his corn on the same ground; sown wheat in the same field; pastured the same land. He has heard of rotation of crops, but does not know what it means, nor cares to know. A broad hole has this man in his pocket.

And who has not got a hole in his pocket? Reader, have not you? Look and see. Is there not some way in which you let slip the dimes you might better save; some way in which you waste time and strength and mind? If so, then you have a hole in your pocket. Indeed, many a man's pocket is like a sieve. Whose pocket is a treasury, safe and sure? — *Daily Ex.*

PRESERVE CORN—QUICK GERMINATION.—Dr Chamberlain, of Buren county, Illinois, has made some important experiments in the germination of corn, and claims to be able to produce a very rapid and speedy growth, by soaking the seed in a solution of chloride of lime. An Illinois paper says:

"Last year Dr Chamberlain of this place made some practical experiments, and demonstrated that nearly half the time may be saved in germinating the seed by the use of chloride of lime.

"Not satisfied with the success of last year, he is again experimenting. In his office he has four boxes; in the first is corn planted without soaking, and the seed is not germinated; in the second the seed was soaked in warm water, which has just commenced to germinate; in the third is seed soaked in a solution of lime, and green blades are just peeping from the ground; in the fourth is seed soaked in a solution of lime and copperas in equal parts, and the blades are now nearly three inches above the ground. All the seeds were planted at the same time, in the same quality of soil, and taken from the same car. The boxes have all had an equal share of heat and light, neither allowed any advantage over the other."

Another fact of importance may also be mentioned; the copperas used in soaking will prevent the birds, squirrels, worms, &c., from eating the seed.

Dr. Chamberlain assured us that one pound of chloride and one pound of copperas, in water, will soak enough seed for twenty acres. Every farmer could afford to make the experiment, even if he should fail to derive any benefit from it.

PLANTING PEAS DEEP TO PROLONG BEARING.—Ellihu Burritt says, in the Homestead, that "the theory, recently advocated of planting peas very deeply in the earth, in order to prolong the bearing capacity of the vines, has been well tested in Williamstown, and found to be correct. A farmer told me that he plowed a furrow beam-deep; then scattered the seed peas at the bottom; after which he turned a deep furrow upon them with his plow, covering them, if possible, to the depth of twelve or fourteen inches. They pushed their way up through the thick mass of earth very soon, and, instead of turning yellow at the bottom and dying after the first gathering, they blossomed and bore until he was tired of picking the pods."

SALTING FENCE POSTS.—A correspondent of the New Hampshire Journal of Agriculture says, "that thirty years ago he set some fence posts, which, upon recent examination, proved to be perfectly sound. This preservation he attributes to the fact of his having bored each post with a two-inch auger, about three inches above the ground, filling the hole with salt, and plugging it up. The quantity of salt in each post was about the half of a pint."

SORE EYES.—A little alum boiled in a tea cup full of milk, and the curd used as a poultice, is excellent for inflamed eyes.

## THE SENTINEL,

Is published every Friday morning at One Dollar and Fifty Cents per annum, if paid within six months from the time of subscribing or Two Dollars if not paid till the expiration of the year. No paper discontinued until all arrearages are paid, unless at the option of the editor.

☞ ADVERTISEMENTS conspicuously inserted at the rate of one dollar per square for the first three insertions, and twenty-five cents for every subsequent insertion. TEN LINES to constitute a square. If the number of insertions be not marked upon them, they will be continued until forbid, and charged accordingly. A liberal deduction will be made to those who advertise by the year.

☞ COMMUNICATIONS, the effect of which is to promote private interests, or matters of trade, and are to be paid for, the rate of fifty cents per square. All communications must be accompanied with the author's name otherwise they will not be inserted.

☞ Advertisements for Companies, Associations of any kind, denominational, charitable or otherwise, are in all cases to be paid for at the usual rates; and obituary notices or eulogies in addition to the announcement, will be charged at the rate of fifty cents per square.

☞ OFFICE next door to the house on the south-west corner of the Square.

An Important Letter
From Rev. JACOB SECKLER, well known and highly respected throughout the State of Pennsylvania:
HANOVER, Pa., February 16, 185
Messrs. S. W. FOWLE & Co., Boston.—Gentlemen: Having realized in my family important benefits from the use of your valuable preparation—*Wistar's Balsam of Wild Cherry*—it affords me pleasure to recommend it to the public. Some eight years ago one of my daughters seemed to be in a decline, and little hopes of her recovery were entertained. I then procured a bottle of your excellent Balsam, and before she had taken the whole of the contents of the bottle, there was a great improvement in her health. I live in my individual case, made frequent use of your valuable medicine, and have always been benefitted by it. *I would, however, caution the public against imposition, because there is a good deal of spurious Wistar's Balsam of Wild Cherry about throughout the country.* JACOB SECKLER.
MILFORD, Del., October 25, 1858.
S. W. FOWLE & Co., Boston: Please send me a supply of Wistar's Balsam, as I am nearly out, and there is great demand for it; it is doing wonders at cures *Coughs, Asthma, Whooping Cough and Consumption*, without fail. There has never been any of the genuine here until you sent me a lot some time since, but plenty of the counterfeit.
Yours, truly, *JACOB V. FOUCK.*
☞ REMEMBER, therefore, *all who seek health*, that the *only genuine* has the written signature of I. BUTTS, as well as the *printed* name of the *Proprietors, SETH W. FOWLE & CO., Boston*, on the *outside wrapper. Take other*; it were money wasted and health imperiled.

HAGERSTOWN ADVERTISEMENTS.

GEISER'S
PATENT SELF-REGULATING
GRAIN SEPARATOR,
CLEANER AND BAGGER,
AND THE LATEST IMPROVED
Iron Tripple-Geared
HORSE-POWER,
All Furnished Complete, if desired, no
Four Wheels.
THE subscribers desire to call the attention of the Farmers and Thrashermen of Montgomery and adjoining counties to their Improved Machine for the present year. This machine has now been before the public for six years, during which time it has earned for itself the reputation of being the best Separator in use; and we have made some very important improvements and additions for the present year, which renders it still more perfect, and we take pleasure in recommending it to the public, knowing that it cannot fail to give general satisfaction. We are now manufacturing two different sizes, as follows:
No. 1, the largest size, is 8-horse power, 36-inch Iron Cylinder, Trunk 37½ inches wide, with Stacker, delivering the straw 30 feet beyond the feeder and upon the stack 18 feet high, and can be easily managed either to carry the chaff with the straw, or deliver it in a separate place if required. It bags the grain, by reasonable management, sufficiently clean for market, and its capacity, under ordinary circumstances, is from 30 to 40 bushels per hour, or from 200 to 300 bushels per day, using eight horses and the same number of hands; but to force the work, under the most favorable circumstances, it will do considerable more, or, with the same number of horses and less hands, it will thrash and clean as much more grain per day than any other machine now in common use and with much more ease and agreeableness to the hands.
No. 2 is the same as No. 1, except something less in size and capacity; it is from 7 to 8-horse power, 30-inch Iron Cylinder, Trunk 31 inches wide.
Persons having good Thrashers, can have Separators, suitable for their capacity, attached, at a comparatively small cost. All our machines are sold under a warrantee.
We being practical mechanics, and being engaged in the manufacture of these machines for the last five years, and one of us having the advantage of twenty years practical experience in the thrashing machine business, and having in our employ the most skillful workmen, and using the best material, we flatter ourselves that we are prepared to manufacture these celebrated machines in the most substantial manner.
REPAIRING done in a workmanlike manner. All our work warranted to give satisfaction, or no sale. Orders respectfully solicited.
JONES & MILLER, Manufacturers,
Union Agricultural Machine Works,
june 1—6m Hagerstown, Md.

Attention Farmers!
THE SUBSCRIBER of Middletown, Frederick co., Md., offers to the public one of the largest and most approved style of—
SADDLES, BRIDLES, HARNESS, HAMES, WHIPS, WAGON GEAR, &c.
ever offered in the Middle Valley, outside of Baltimore city—made of the best leather, (tanned by the old Dutch process,) by the best workmen. My stock consists in part of the following articles:
☞ 91 Saddles; 36 Bridles; 36 Blind Bridles; 120 Dozen Wagon Whips; 41 Sets Carriage Harness; 18 Sets of Breechen and Side Harness, from four to six inches wide; 15 Sets Wagon Harness, from four to ten inches wide; which we will sell to prompt-paying customers at six months time, without interest.
I will also MAKE TO ORDER any article in my line of business at the shortest notice, and deliver it to any part of the District, free of charge, and if not as ordered, not taken.
As I do not compel persons to take what does not suit them, and being in want of any thing in my line of business will do well to give me a call before purchasing, as I have never failed to please a reasonable man, and am determined to sell for less than the same articles can be bought any where in the State. Don't forget the place, as you are sure to get a good article, at a low price.
All persons advertising may have their articles and sell the cheapest, but all we ask is a trial from one and all.
☞ I will pay 6 CENTS PER POUND for HIDES, delivered at JUNIUS'S, middle of Montgomery county, Md., in Saddlery, at cash prices.

HAVING MADE
Large Additions
TO OUR FORMER
STOCK OF GROCERIES,
IN ALL ITS BRANCHES,
WE are now, and will be hereafter, able to furnish all articles in our line of business near about Baltimore prices.
Having made arrangements so as to purchase on as good terms as any house in the District, we feel confident, with these facilities, that we can do the buying public justice in every respect.
We would most respectfully solicit a call from Country Merchants and Farmers, as we will take great pleasure in showing our goods, having them constructed, as regards quality and prices, with any house in the District.
