VALUABLE LAND IN ALLEGANY COUNTY, FOR SALE.

A TRACT OF LAND called TREASURE TROVE, containing about SIX THOUSAND ACRES, originally granted to John W. Pratt, on the 31 day of March, 1801, and resurveyed for the Hon. Thomas H. Pratt about the year 1836.

It is situated about 13 miles east of Cumberland, on the great National Road and Baltimore Turnpike, on the Oats and Indian Corn grow admirably in this region. It is also admirably suited to Sheep raising. There are several Farms opened and cleared upon the land and now under rent. The tract, however, is principally wooded with large Oak and Pine timber, which can easily be transported over a road gently sloping to the Chesapeake and Ohio Canal and the Baltimore and Ohio Railroad, which run within 3 miles of the southern boundary of the tract.

In the centre of the tract are several remarkably fine Springs of different strengths, issuing from a small valley within a few yards of each other. These, with another Sulphur Spring in the same vicinity, have for years been known and resorted to first by the Indians and afterwards by the Hunters for their Hygeian qualities. A few miles off across the mountain is a very fine LOOKING GLASS SPRING, which is well known in the neighborhood and is remarkably adapted to the cure of all cutaneous diseases.

The whole is offered for sale at very low rates and on long credit, as it will be divided into SMALL FARMS or slices to suit purchasers. Apply to

TRENGO'S CEREAL AND PLANT FOOD AND RUST PREVENTIVE,

TESTED AND APPROVED BY

DAVID STEWART, M. D.

CHEMIST

MARYLAND STATE AGRICULTURAL SOCIETY.

SOLD BY

P. MALCOM & CO., General Agents,

BALTIMORE.

This Compound contains all the SEVEN ELEMENTS that compose CEREAL and PLANT FOOD. It hastens, by ten or twelve days, the maturity of the Plant and Grain, and specifically adapted to crops requiring an early and vigorous start to bring them to perfection. For late seeding (especially upon Corn grounds) where the soil plant food has been rapidly removed by the previous crop, it SECURES THE WHEAT FROM RUST and insures a good yield of the best quality of grain.

We submit the following results of the use of the "Plant Food:"

PORT PENN, Del., Sept. 7, 1861.

Messrs. TRENGO & SON, Baltimore.—The "PLANT FOOD" spread this spring both here and at the experimental farm at St. John's College, Annapolis, doubled, and I think, trebled (as the weights will prove) my product of both grain and straw. There was no doubt about that. No marks nor stakes were required at any period, the dark green color, the *blooing* of the grain, giving the appearance of pounds the number of plants from the same number where the PLANT FOOD was applied; the stoutness and height of the plant and the straw, all told the same story, viz: that the PLANTS threshed room, of which the soil alone was deficient. No other reason could possibly be assigned, as the crop was sown and harrowed in *before* the manure was spread as a top dressing.

Yours respectfully, DAVID STEWART, Professor of Agricultural Chemistry, St. John's College.

NORTH EAST, Md., Sept. 5, 1861.

Messrs. WM. TRENGO & SON, Baltimore:

Supplied the "PLANT FOOD" at the rate of one to two hundred lbs per acre on Oats ground last spring, and the crop was very good, fully up to my expectations. I also applied it to Corn in the hill, putting in a very small quantity in each hill, the Corn started and has kept far ahead of that on the side of it, which was manured with ashes in the hill.

From the little experience I have had with it, I think it preferable to Guano or Bones—and shall so recommend it.

Yours respectfully, RUSSELL THOMAS.

The PLANT FOOD is put up in substantial bags of 150 lbs each. m1-tf
