A flat roofed three storey brick building with Victorian period bracketed cornice and with a cornice with flat modillions under it. Victorian decoration is probably later than building, for brick work looks earlier - common bond with header course every 6th row and splayed brick lintels above windows (now 2/2) - one granite step at door. First floor altered, however, building's size and appearance would warrant preservation, especially if city gate were put next to it (corner of Cathedral and West)
