DESCRIBE THE PRESENT AND ORIGINAL (*if known*) PHYSICAL APPEARANCE

Two story frame farm house - type home, three bays by two, facing ~~south~~ northy with a wing back along the east wall, two stories high, two bays by two. A one story porch runs along the north facade. There are no chimneys.

This ~~[illegible]~~ typical - looking 19th century farm house is built over and behind a large log structure, two rooms over a stone cellar ~~that is~~ partly exposed on the north side. Huge fireplaces in this stone sub-structure suggest a possible industrial use for the original building - iron working.

STATEMENT OF SIGNIFICANCE *(Include Personages, Dates, Events, Etc.)*

This house, quite typical mid-1800's country house in appearance, may have been built in several stages.

Mrs Gettings reports that a log building is inside the first floor front two room part of the house, over stone foundations that ~~over has~~ now has two large fireplaces though the chimneys are removed. Was this an early iron-working shop - blacksmithy - while the furnace across the creek was operating?

Over this building, adding a second floor and a wing to the rear of the house, is a frame house now covered with asphalt shingles. The wide eaves of the slate roof are characteristic of buildings in the 1870's.
