DESCRIBE THE PRESENT AND ORIGINAL ~~(If known)~~ PHYSICAL APPEARANCE

This little house in two parts has log walls in both sections covered by clapboard. A "telescope house", oblong, a small wing entirely of log construction sits beside a larger section whose walls are more than 2/3 of log construction. Facing north, the roof ridgeline of each runs east-west. To the east the small section has 2 bays by 0, 1½ stories high with low ceilings upstairs. Windows are at floor level, 3 lights over 6. Elsewhere windows are 6 lights over 6. The main section 3 bays by 1 is two storied. Fenestration is uneven, accommodating the frame enlargement to the log house that forms its core.

There are two chimneys, one near the center of the larger part probably at the end of the original log wall, and the other inside
