Science Shrinks Piles New Way Without Surgery

Finds Healing Substance That Does Both—Relieves Pain—Shrinks Hemorrhoids

New York, N. Y. (Special) — For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain—without surgery.

In one hemorrhoid case after another, "very striking improvement" was reported and verified by doctors' observations.

Pain was relieved promptly. And, while gently relieving pain, actual reduction or retraction (shrinking) took place.

And most amazing of all—this improvement was maintained in cases where doctors' observations were continued over a period of many months!

In fact, results were so thorough that sufferers were able to make such astonishing statements as "Piles have ceased to be a problem!" And among these sufferers were a very wide variety of hemorrhoidal conditions, some 10 to 20 years standing.

All this, without the use of narcotics, anesthetics or astringents of any kind. The secret is a new healing substance (Bio-Dyne®)—the discovery of world famous research institution. Already, Bio-Dyne is in wide use for healing injured tissue on many parts of the body.

This new healing substance is offered in suppository or ointment form called Preparation H.® At all druggists for individually sealed convenient Preparation H suppositories or Preparation H ointment with rectal applicator. Preparation H® is sold at all drugstores. Satisfaction guaranteed or money refunded.
