The illness that never got started

A lot of progress has been made in preventing baby illnesses. Hospitals have learned how to control the germs that threaten even the most spotless nursery.

They have learned that Lysol is one of the most successful preventives of environmental disease ever adopted.

Lysol is the quickest, safest, most effective way to eliminate disease germs while you do your regular housecleaning. Use Lysol Brand Disinfectant in the bathroom, kitchen, nursery, all through the house. Lysol added to your regular cleaning water is more effective than any bleach, any pine oil—at lower cost. And Lysol is as safe to use as your detergent.

Beaten for using parks

BOGALUSA, La. (UPI) —A white woman civil rights worker said city and state police beat her and members of a colored group when they visited a city park.

Rita Marsh of San Francisco said the incident happened after Mayor Esse Cutrer promised that segregation was ended in the city's public facilities, including parks.

She said the trouble started after a menacing band of whites handished guns and began to advance on colored women and children trying to picnic in the park.

She said police loosed dogs on the crowd and at least one person was bitten by one of the animals.
