WAC offering coeds unique job opportunity

College girls in their junior year will be able to earn $163 this summer and $300 a month during their senior year through a new program offered by the Women's Army Corps, SFC Robert E. Burton, the Army recruiter at 2718 Pennsylvania Ave., announced last week.

"The Army's College Junior Program," Sgt. Burton explained, "acquaints young women with life in the WAC and prepares them, if they desire to become commissioned officers in the corps after graduation."

He outlined the College Junior Program as follows:

The program begins with a month orientation and training at the WAC Center in Ft. McClellan, Ala., this summer.

"EACH YOUNG lady," Sgt. Burton said, "receives $16 as a cadet officer while she and over 100 other girls learn about the job a WAC Officer has in today's Army, American military history and traditions, and how the WAC supports the army here and overseas.

At the end of the orientation, each girl who qualifies is offered a choice of options. She can drop out of the program completely or she can defer deciding on whether she would like to become an officer until she graduated from school.

Or, she can choose to be placed in the Army Reserves. If she decides on this course, she will receive $300 a month until graduation as well as be eligible for such other Army benefits as free medical and dental care and post exchange and commissary privilege.

"Though she is given the Army rank of E-4, the equivalent of a corporal," Sgt. Burton pointed out, "she will not attend any meetings or be required to wear a military uniform."

"In return for this assistance," the sergeant went on, "the Army will ask her to serve two years as an officer in the Women's Army Corps."

Among the positions WAC officers hold in today's army, both at home and overseas, he explained, are personnel director, finance officer, administrator, communications supervisor, psychologist, public relations account executive, guidance counselor, intelligence analyst and many more.

Interested young women can contact the sergeant at his office, 2718 Pennsylvania Ave., or phone him at LA-3-44-31.

Unique Discovery Now Makes It Possible To Shrink Hemorrhoids Without Surgery
...Except In Unusually Severe Or Persistent Cases

New York, N.Y. (Special): A well-known research institute has discovered a substance which has the ability to actually shrink hemorrhoids without surgery except in unusually severe or persistent cases.

In case after case the sufferer first notices relief in minutes from itching, burning and pain. Then this substance starts right in to gently reduce the swelling.

Tests conducted on hundreds of patients by leading doctors in New York City, a Southern Clinic and a Midwest Medical Center all proved this so.

The secret is this special substance (Bio-Dyne®)—now offered in both suppository or ointment form called *Preparation H®*. In addition to actually shrinking piles Preparation H lubricates and makes bowel movements more comfortable, and soothes irritated tissues. It also helps prevent further infection (a principal cause of hemorrhoids).

Only Preparation H contains this substance. No prescription is needed.

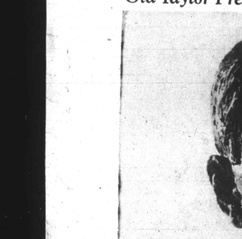
Old Taylor Presents: Ingenious Americans



Dr. Daniel Hale Williams (1858-1931)

He performed the first successful heart operation.

On a cold, windy night in 1893, a man was rushed to Chicago's Provident Hospital with a knife wound a fraction of an inch from his heart.

On duty was the hospital's young founder, Dr. Dan Williams. Instead of administering the usual sedatives and prayers, Dr. Williams summoned six of his colleagues to help him make history.

It was a long shot. X-rays, sulphur-drugs, blood transfusion—today surgical necessities—were little known medical tools at the time. Yet, with great skill, Dr. Williams performed the impossible: the first successful heart operation. And the patient lived.

Had it been any other hospital or any other surgeon, the man might have died within the hour. "Sewed up the human heart", headlined a Chicago newspaper.

That hospital operating room was a long way from the small frame house outside Pittsburgh, where Dan was born. By the time he was twelve, his father had died and his mother had deserted.

So, Dan took to the road and settled in Wisconsin as a barber. Scraping together enough money for an education, Dan put himself through a local academy.

From Wisconsin he went to Chicago, and with the help of a prominent family, Dan Williams entered Northwestern Medical School. He graduated in 1883 and opened an office on Chicago's Southside.

In 1891, Williams founded the Provident Hospital, the first infirmary open to all patients and physicians, regardless of race or creed.

From Chicago, Williams was called to Washington to reorganize and head the Freedmen's Hospital, then operated by the Federal government. He organized Freedmen's intra departments, collected a staff of twenty specialists, and created the beginnings of a nursing school.

Under William's administration, this once primitive institution housed in six pre-Civil War buildings, soon became the forerunner of our modern hospital.

Every time another heart operation saves a life, it is a living tribute to one of the truly great "Ingenious Americans".
