Food Tips

Lettuce as we know it today probably developed from wild lettuce, a weed now scattered over the globe. (Columbus brought lettuce to the New World, and it's a good thing that he did!) For lettuce is now among our leading vegetables, because of the growing popularity of salads in our diets.

• • •

It's available throughout the year but is plentiful and more economical right now, as are all fresh vegetables, according to the U.S. Department of Agriculture. Don't forget to use it liberally in sandwiches during August Sandwich Month, as well as in crunchy, colorful summer salads.
