Avoid a questioner, for he is also a tattler—HORACE.

Murder Is Always Murder

There is a great hue and cry in this city because Policeman Joseph D. Benedict was shot and killed by a white highwayman last Friday morning. Sun says that the murder is far more than a personal tragedy. We don't agree with the Sun in this because murder is murder. It makes no difference whether a policeman is killed or a citizen.

We contended that to enforce the law, police must be able to defend themselves. They are given guns, billies and blackjacks for their protection.

They are the only match we know for killers who carry guns—to catch and to imprison these enemies of society.

Our white brethren in this town get quickly out of reach when the law is violated in certain cases. Make no mistakes about it, law, but on the other hand we are greatly depressed when we read of our newspapers and some of our first class citizens wink their eyes when violations of the law do not touch them identically.

A few years ago some colored men were lynched on the Eastern Shore. Not a single person was punished for those killers and lynchers.

Our colored men were lynched because they have been violated broken out windows and covered the outside with paint.

If Commissioner Atkinson had detailed just one policeman to find out who it is that seeks to terrorize the W. Fay. The Sun knows as well as we that you can't disdain the law and trample it underfoot in small cases and then look for more respect in others.

No Wishy-Washy Religion, Please

The highest Episcopal court in the state of Maryland, next to Bishop Noble C. Powell himself, is the Standing Committee which consists of clerical and lay members who are elected at the annual convention.

Among the resolutions passed was one to organize Episcopal Clubs for Episcopal students at Howard University and Morgan.

Another action of the conclave was the adoption of a lay memorial to Bishop Powell.

Mr. Cadwalder is an attorney for the Mt. Royal Improvement Association, probably the largest in Baltimore and one which employs one of the most prominent Episcopal laymen as its attorney.

There are some things that no real and true Christian Episcopalian need to do to make a living. It would seem to us that this would be one thing that we would not do for hire if we were lawyers.

And if we ran the Episcopal Church, we would not have that kind of church on our campus.

Although it is a member on the Standing Committee, Mt. Royal Improvement Association is moving forward and Morgan, we would not be particularly anxious to have this representing the kind of church on our campus.

During the time for the Episcopal Church to get off the fence on the question of civil rights is paramount to Christianity. The question of civil rights is paramount to Christianity. It is time for the Episcopal Church to take some stand on these matters.

There is no place in this community for wishy-washy religion.

The Douglass Auditorium

It is revealed this week that the Douglass High School auditorium has not been renovated since the school was built in 1925 so that nobody has asked that it be cleaned up. It is 23 or 8,372 days since any number which breaks down into 3,186 weeks or 676 weeks, until the needed renovations are started, the auditorium has been used in regular use.

Hereafter, until the needed renovations are started, the auditorium number of weeks since fresh paint was used will be given on this page.

Pupil, teacher, parent as long as you are responsible for your citizenship.
