## IN THE STARS

# Cancer and Leo — A Double Spotlight! By Cosima

### SPOTLIGHT ON CANCER
### JUNE 22—JULY 23

Now that your checkbook looks a little less grim you can get back to what's really important to you . . . love. You, a partner, the Moon and a perfect summer night. What could be better for a Cancer man or woman? For the Cancer man it might provide the perfect opportunity to open up to that woman you want. Cosima knows you aren't exactly a chatterbox and can be as closed as a bank vault but this is the month to make an effort. She won't wait forever. Time to decide if you are shy or forward, Cancer woman. You can't have it both ways even though it usually works for you. He is getting tired of those games you are so good at. You are going to love the end of the month if you take care of business now. Speaking of business, that executive position you've had your eye on hasn't slipped away from you; it's just on hold. Don't get gloomy and moody about it, just enjoy the summer and look forward to a change in September. Parents, be patient with your little Cancer's tears. Try an extra hug, a joke or an explanation.

### SPOTLIGHT ON LEO
### JULY 24—AUGUST 23

Cosima loves watching Leos age. Such pride and elegance in that slightly slowed-down step. With each new grey hair your natural wisdom is finally beginning to fit you more comfortably. Young or not so young, watch that willfulness. Your situation at work may not be so clear anymore. You know you aren't arrogant and egotistical but your style makes it seem that way to your co-workers. Get right with them. If you are looking for love, try an Aries or a Gemini. Stay out of shopping centers. You don't need any more clothes. Leo men, you really can give up being boss without losing your essence. Some of you will have no choice. Try it! Leo women, that unaccustomed feeling of being out of step will pass by early fall. Use your fabulous sense of humor to get you through this tedious period. Both Leo men and women need to work on ambivalent feelings about money. It is alright to have it or not, to reach for that high paying job or try to save the world and make less. What isn't alright is not to be sure about which path is the right one for you. You need to work on financial clarity before you make any major decisions.

### VIRGO
### AUGUST 24-SEPTEMBER 23

Thank heavens for Virgos! Who else would keep us on the right track about what's proper and logical? It even works in the love department ... sometimes. You get in trouble when you are too practical. Loosen up, take off your shoes and dance around in some wet grass. Cosima has heard there is someone in your life just waiting for you to show how sensual you really are. Smile! And, on the serious side, it is time to think about your job. You have every right to complain about the way you are treated. Just choose your words carefully so you don't sound mean and nasty.

### LIBRA
### SEPTEMBER 24-OCTOBER 23

Even though you are feeling a little easier about your work situation don't assume everything is settled. Keep an eye on the situation. Now is the time to give some thought to going back to school or just taking a course for fun. It is a shame to let your sense of justice go to waste. Libra boss: Do You want that woman in your office to be in love with you or are you just bored and looking for a way to kill time? There are some Libras out there who could stand to take a vow of silence, at least for the summer. How you do love to dish! Look out, your mouth may get you in trouble.

### SCORPIO
### OCTOBER 24-NOVEMBER 22

You believe too much of your own publicity about being sexy. If you don't ease up you are going to end up in the hospital with some visitors who may be embarrassing to your mother, if not to you. Give it a rest. Use some of that urge to excess to look for a career that gives you the freedom and creativity you love so much. Summer is the perfect time for those self-sufficient, determined Scorpio children to get into everything from poison ivy to trouble less easily cured. Watch them, advise them and love them firmly when you must.

### SAGITTARIUS
### NOVEMBER 23-DECEMBER 21

Go outside, run around, start a business, but do something with all that restless energy! This might be the perfect time for you to join an exercise class or even start one. It will help you with your co-ordination, your weight and maybe even your social life. Have you ever thought of taking tap dancing? Another Sagittarius, Sammy Davis, Jr., has done real well with it. At least someone's love life is going well. You give marriage such a good name and make the rest of us believe there is hope. Your sense of fidelity is admired and respected.

### CAPRICORN
### DECEMBER 22-JANUARY 20

Cosima is happy to see that you are feeling less lonely this month. Just remember, you must appreciate yourself before you can expect anyone else to notice how lovable you really are. Let those emotions go and wonderful experiences will come back to you. Don't be distant and cool when you meet your opposite this summer. It could be the person you've been waiting for. You are such a conscientious worker; it is too bad you aren't appreciated. It may be time to look around. Don't get angry
