Of course you have! For Ollie —(she'll always be Ollie to her associates at HENDIN'S) has been one of our most popular stylists for years.

"EASY DOES IT"

BY . . . HELEN HALE

Spot and stain removal is not the simple job it used to be because of the combinations of fibers used in the same material and the new and varied finishes employed. Many stains, however, can be removed if they're treated as soon as they occur.

If you're in doubt about the material, you can always try sponging with warm water as the first step. This will not usuallly affect even materials which are non-washable. Rinse thoroughly and carefully so there will not be a ring around the stain you have removed.

Make Bleaches Mild

Bleaches are not recommended except on solid white cottons as they are frequently too harsh. If you do have to use them, make a mild solution and apply carefully.

RECIPE OF THE WEEK
Broiled Fish Puffs
(Serves 6)

½ cup mayonnaise
½ cup sweet relish
2 tablespoons chopped parsley
2 tablespoons lemon juice
½ teaspoon salt
2 egg whites
1½ pounds fish fillets

Combine first five ingredients and fold into stiffly beaten egg whites. Cut fish into individual servings and place in baking dish. Broil from 4 to 6 minutes, about 4 inches from flame or heat. Remove from broiler and cover with sauce. Broil 3 minutes longer or until puffy and golden brown.

The first rinse should be vinegar and water to neutralize the bleach, and the following rinses should be clear water.

On Stain Removal

If acetate is present in the material, many cleaning agents will have to be eliminated. Test for acetate in the fabric by placing a drop of acetone on an inconspicuous seam of the material.

Some stains can be removed if treated immediately, while if allowed to remain can never be removed. These include fruit and berry stains, soft drink spots, cod liver oil, iodine and mercurochrome, grass, paint, mildew and ink.

Soap and water removes mildew stains. Let the sun bleach out what remains.

When people desire to be blessed all eyes will be focused on

COLGATE DENTAL CREAM STOPS TOOTH DECAY BEST

Better Than Any Other Way Of Preventing Tooth Decay According To Published Reports!

READER'S DIGEST FOR JULY reports on one of the most extensive experiments in dentifrice history! And remember these additional facts: The toothpaste used *exclusively* in this research was Colgate Dental Cream. Two years' research showed brushing teeth right after eating with Colgate Dental Cream stopped tooth decay *best!* Better than any other home method of oral hygiene! The Colgate way stopped *more* decay for *more* people than ever reported in all dentifrice history!

NO OTHER TOOTHPASTE OR POWDER—AMMONIATED OR NOT—OFFERS PROOF OF SUCH RESULTS! Over a two-year period, leading scientists found no new varieties whatever for more than 1 out of 3 who used Colgate's correctly! No dentifrice can stop all tooth decay, or help cavities already started. But the Colgate way is the most effective way yet known to help your dentist prevent decay!

BEST TEST MARKETS in the NEGRO FIELD

"Controlled Coverage" of a market of well over half million homogenious, urban consumers is available at low cost with the nations two best semi-weeklies, ie., Baltimore Afro-American and the Washington Afro-American. Seven out of eight families in Baltimore and three out of four in Washington read their Afro-American regularly.

The Negro markets in Baltimore and Washington (only 35 miles apart) surpass any in America in income, literacy, home ownership and employment. If you sell consumer goods or services you'll find it an exceptionally responsive field . . economical to sell and to service. Inquiries invited.

Quick Facts on the Baltimore-Washington Markets

- Nearly 600,000 Negroes live in the Baltimore-Washington area.
- 77% of Baltimore's workers are graded higher than semi-skilled; 80% of Washington's workers are in the upper brackets.
- Property owned in Washington alone exceeds 43 million dollars in value. A strong indication of buy-ability.

Summer Squash Head Good Buys for Week's Marketing

Maryland grown summer squash is given first place on the "best buy" list this week, according to Virginia C. Sherbourne, Food Economist for the Baltimore Office of the State Department of Markets.

Both the white or scallop variety and the yellow summer squash is an excellent choice for the "something hot" in summer meals, too. It is quick and easy to prepare. The squash need not be peeled or have the seeds removed, provided it is young and tender.

When choosing summer squash at the market, be sure it is small to medium sized, and fairly heavy for the size. It should be free from blemish and with rind so tender it can be easily punctured. Avoid the shriveled, spotted or hard shelled offerings. Squash may be served baked, mashed, stuffed or fried. Since there are so many different ways of preparing the squash may appear often on the table and remain popular with the family!

Potatoes Reasonable

Potatoes continue to be among the "best buys" this week. Supplies are arriving from Maryland, Virginia, North Carolina and Delaware. The quality is good. Maryland snap beans are a very good value. Offerings are plentiful and of excellent quality. Locally grown beets and Maryland, Pennsylvania and Virginia cucumbers are two more good "buys." Maryland sweet corn is now available at low prices. The first Maryland grown peppers also arrived in the local markets this week.

Melons again take top honors in the fruit economies. Watermelons are a good value, and North Carolina and Virginia cantaloupes are reasonable in price. Apples from Maryland, New Jersey and Pennsylvania are more plentiful.

Meat prices are steady to slightly higher. Some beef cuts, veal and pork all rose in price. Bacon and sausage are good choices. Poultry is higher in cost, too, but prices are still in the reasonable columns.

Grade A Large eggs are economical and offer a good substitute for the higher priced meats.

SQUASH IN CREAM

Cut squash in cubes. Put in saucepan with enough boiling water to cover bottom of pan. Cover tightly and boil 5 to 8 minutes. Pour in milk or half milk and half cream until squash is almost covered. Add butter, salt and pepper. Shake to mix. Lower heat and simmer until milk is almost absorbed.

SUMMER SQUASH WHOLE

Wash small size summer squash. Peel and seed them if you wish. Steam them covered in a strainer over boiling water until they are tender. Serve them with melted butter or tomato sauce.
