You can help us raise the colorectal cancer cure rate.

"If everyone over 50 had checkups for colorectal cancer, the cure rate could be as high as 75%," says Dr. Lasalle D. Leffall, Jr., past president, American Cancer Society. "You can't cure it if you don't know you have it." But if it's detected early, the cure rate for colorectal cancer is very high. Your doctor can perform the digital and proctoscopic exams, and you take care of the simple stool blood test at home.
Since men and women are equally affected by this disease we urge everyone over 50 to get regular checkups.
The warning signs for colorectal cancer are a change in bowel habits and blood in the stool.
People with a family history of colon or rectal cancer or ulcerative colitis are at higher risk and are urged to be doubly cautious.
Checkup Guidelines for men and women over 50 without symptoms:
• digital exam annually
• stool blood test annually
• proctoscopic exam every 5 to 5 years after 2 negative tests 1 year apart
