The State Tobacco Warehouses.

From the Marlboro' Gazette.

The advantages of the proposed sale of the present Tobacco Warehouses, and the construction of one or several contiguous new buildings on deep water, are briefly these, viewed with reference to location at Canton.

The present Warehouses are most of them old, and some of them dilapidated, not at all fireproof, but on the contrary of a very combustible character. Three of them are situated on the shallow water of the basin, and two of them inland at some distance from the water.

A new building may be constructed upon lot having two fronts of 560 and 700 feet respectively, upon the deepest water of the harbor; and a railroad track is now in use upon the street which is one of the boundaries of the lot.

The situation of the property is such as to admit the entrance of the railroad track from the street into the second story of the Warehouses for receiving Tobacco, and in the basement other railroad tracks may be constructed running out upon the piers for the delivery of Tobacco to ships or for the receiving of it from steamboats and schooners.

The new building might and ought to be constructed in a far more durable and substantial manner than those now in use, and is required by law to be fireproof.

The labor might be principally performed by means of a 10 horse power steam engine—certainly the hoisting of Tobacco and the moving of the trucks upon the railway to and from the piers might be done in this manner with great economy.

The saving in drayage would be an important item. At present Tobacco arriving by the Baltimore & Ohio Rail Road incurs an expense of drayage to Warehouse of 12½ and 18¾ cts. per hhd. The Philada. W. & Baltimore Rail Road Co. offer to haul it over their track from that of the Balt. & Ohio R. R. for 10 cents per ton, or less than 5 *cents per hhd.* Tobacco arriving by water would incur no drayage. And the present expense of 31¼ to 37½ cts. per hhd. upon Tobacco shipped from Baltimore would be entirely saved.

The labor expenses would be greatly diminished by having regular work for the hands and by having the force proportioned to the need for it, instead of, as at present, maintaining a separate corps of laborers at each Warehouse whether required or not.

The new Warehouses ought to be readily accessible by City Passenger Railway: and such is the case at Canton. The opposition to the great reform contemplated in the removal of the Tobacco Warehouses is all traceable to the *purchasers*, who rest their objection to the measure upon the ground of the greater convenience to them afforded by the present locations, in watching the progress and act of inspection of the various description of Tobacco.

Now it is respectfully suggested, without any intention of imputing unfair motives to any class of persons, or to any body, that so long as the inspection of Tobacco is confided to officers of the State, and so long as the existing practice of selling Tobacco by samples continues, it is obviously proper to remove those officers beyond the reach of any influencies calculated to affect them.

Another advantage which it is understood was one of the objects designed to be gained by the framers of the bill, was the greater security for the proper performance of their duties by the action of the Inspectors jointly, instead of separately as heretofore.

A most important and imperative consideration in favor of the change is the obvious necessity for increased accommodation for the storage of Tobacco in the Warehouses of the State.

It has been ascertained that the greatest capacity of the present Warehouses does not exceed 26,500 hhds, whereas the quantity of Tobacco on hand at one time has reached 32,751 hhds. The expense of storage upon this excess of Tobacco, which the present buildings were inadequate to receive, together with other costs incidental to the use of private Warehouses, has been a heavy charge upon the Tobacco fund. The ample accommodation required by the law to be provided in the new buildings will obviate any such necessity in the future and thus effect an entire saving of this large item of expense.

The improved economy of the whole arrangement, which is shown in this hasty outline, must result in a material reduction of the cost of Tobacco Inspections, and in a few years the improved condition of the Tobacco fund would justify a lower charge of outage than that now fixed by law.

The following is an official copy of the Law referred to in the above communication:

AN ACT

Entitled an Act, to provide for disposing of the State's Tobacco Warehouses, and for the building of a new Tobacco Warehouse or Warehouses on deep water.

Section 1. *Be it enacted by the General Assembly of Maryland*, That Richard H. Miles, John D. Bowling and William Thompson, (of R.,) be and they are hereby appointed Commissioners to dispose of the property known as the State's Tobacco Warehouses in the city of Baltimore, or of so much thereof as may be necessary for the purposes of this Act, and to erect a new Warehouse or Warehouses in their stead as hereafter provided.

Section 2. *And be it enacted*, That before the said Commissioners shall proceed to act, they shall take and subscribe before the Clerk of the Superior Court for Baltimore City an oath or affirmation that they will faithfully discharge their duties as Commissioners under this act, and shall also severally enter into bonds in the penalty of Fifty Thousand Dollars each, conditioned for the faithful discharge of their duties under this act, which bonds shall be approved by the Governor or Comptroller of the State, and be lodged for record in the office of the Clerk of the Superior Court for the city of Baltimore, and a copy thereof under the seal of the Clerk of said Court, shall be good and sufficient evidence thereof in any Court in the same manner, and to the same effect as if the original thereof had been produced and proved.

Section 3. *And be it enacted*, That as soon as the said Commissioners shall be duly qualified to act as herein before required, they shall proceed to ascertain and estimate the value of the several Tobacco Warehouses and the lots attached thereto belonging to the State, and shall return a separate estimate and valuation of each of said lots, and Warehouses, to the office of the Secretary of State, to be there kept and preserved, provided however, that said Commissioners shall not dispose of any of said Warehouses, or any lot or lots whereon said Warehouse or Warehouses are located, for a sum less than the estimated value of said Warehouse or Warehouses and the lot or lots upon which said Warehouses stand, and the said Commissioners shall be required to sell the same at public auction, after having first given public notice of at least ten days previous to said sale, provided the sum bid shall equal or exceed the estimated value.

Section 4. *And be it enacted*, That the said Commissioners shall have power to contract for the purchase or leasing of a lot or contiguous lots of ground fronting and binding on navigable water of sufficient depth to admit the access of vessels drawing twenty feet of water when loaded, and on the North West Branch of the Patapsco River, and of sufficient number of feet both in front and in depth, to admit of the building thereupon of a Warehouse or Warehouses competent to receive for inspection and storage all the Tobacco which in the judgement of said Commissioners will be on hand for inspection and storage in the city of Baltimore at any one time, and they shall also have power to contract for the building of the said Warehouse or Warehouses, with all the screws, weights and appurtenances necessary for the prompt and convenient inspection of Tobacco, provided, however, that the said Commissioners shall not enter into any contract as hereinbefore provided, until and unless they shall first have ascertained that the proceeds of the lots and Warehouses now owned by the State, will be sufficient to defray the whole cost of the new Warehouse or Warehouses authorized to be built by this Act, and the said Commissioners shall have power either to sell the said lots and Warehouses now owned by the State or any part thereof, and to apply the proceeds or any part thereof, to the erection of a new Warehouse or Warehouses, or to expose of them in exchange for the lot or lots hereby authorized to be purchased, and for the erection of the Warehouse or Warehouses, hereby authorized to be built, as in the opinion of said Commissioners may be most advantageous and economical, provided, that the said Commissioners, before they proceed to purchase sites for said Warehouses, and before they proceed to enter into contracts for erecting said Warehouses, they shall open proposals for the purchase of said sites, and the erection of said Warehouses setting forth the number of contiguous lots together with the Warehouses to be built thereon, and all the necessary specifications relating thereto, as also the day when said proposals shall be opened, and the contract or contracts awarded, and the said contract or contracts shall be awarded to the lowest responsible bidder for the erection of said Warehouses, and the lowest offer per foot for the fee simple title to said lots upon which said Warehouses may be erected.

Section 5. *And be it enacted*, That the said Warehouse or Warehouses shall be fire proof built upon the most approved plan and in the most substantial manner, and in case the said Commissioners shall determine to build more than one, they shall be erected upon adjoining lots, so that the inspection of all the Tobacco inspected in the city of Baltimore may be conducted under the supervision of all inspectors, instead of separately and in different Warehouses as by the existing law and practice.

Section 6. *And be it enacted*, That it shall be the duty of the said Commissioners, to require all persons contracting with them for the erection of the said Warehouse or Warehouses, or for any part thereof, to give bond to the State in penalties fixed by them, and with sureties to be by them approved conditioned for the faithful performance of said contract or contracts according to the terms thereof, which bond or bonds shall be recorded in the office of the Clerk of the Superior Court for Baltimore city, and a copy thereof under the seal of said Court shall be as good and sufficient evidence thereof in any Court, as if the original had been produced and proved.

Section 7. *And be it enacted*, That so soon as the said Warehouse or Warehouses shall be ready for the reception of Tobacco for inspection, it shall be the duty of the inspectors of Tobacco, to remove and carry on the inspection in the said new Warehouse or Warehouses, and to remove thereto, all the Tobacco remaining in the present Tobacco Warehouses for inspection or on storage.

Section 8. *And be it enacted*, That until the said new Warehouse or Warehouses shall be completed and ready for use, the existing State Warehouses shall be used and occupied by the State as heretofore, and all contracts made for the sale or exchange thereof, or of any of them by the said Commissioners, shall be subject to the right of the State to use and occupy them, until the completion of the Warehouse or Warehouses hereby authorized to be built.

Section 9. *And be it enacted*, That the said Commissioners shall have power to make and execute all deeds and conveyances necessary for the execution of this law, and for the discharge of the duties hereby devolved upon them; and shall receive such compensation as the Legislature may allow, not exceeding four dollars per day, while actually engaged in their duties aforesaid, for each of them, to be paid out of the proceeds of the sales of the existing Warehouses, and a majority of said Commissioners shall be a quorum competent to any official act.

Section 10. *And be it enacted*, That if there be any surplus of the proceeds of the sales of the said Tobacco Warehouses after defraying the cost of erecting said new Warehouse or Warehouses and the expenses attendant thereupon as provided by this bill, the said surplus shall be paid into the Treasury to be credited to the Tobacco fund.

Section 11. *And be it enacted*, That this Act shall take effect from its passage.

TRUSTEE'S SALE.

BY virtue of a Decree of the Circuit Court for Montgomery county, as a Court of Equity, passed in the cause of Peter Hager, complainant, vs. Leopold Snyder and wife, defendants, the subscriber, as Trustee, will offer at public sale, to the highest bidder, at the Court-House door, in Rockville,

On TUESDAY, the 1st of May next,

at the hour of 12 o'clock, M., the following

Farmers, Take Notice!

Agricultural Implements, Seeds, &c.,

Ten per cent. Lower than any House in the District.

WE have made arrangements with several extensive manufacturing establishments which will enable us to offer goods in our line to the Farming community, at greatly reduced prices. We have now on hand a large stock of Implements, including the

Minor & Horton PLOW,

with *our* improvement, which makes it superior to the old pattern, rendering it of lighter draught, with less labor to the plowman, and warranted to turn a flat furrow. Farmers are invited to call and examine it.

Garden Seeds!

We have also a large assortment of Garden Seeds, which have been selected with great care, which we highly recommend.

Also, *FIELD and GRASS SEEDS* of all kinds, which will be sold low.

Guano, Guano.

A GUANO CARD.

THE undersigned having noticed in the Rockville "Sentinel" an advertisement over the signatures of certain dealers in Guano in the District, would respectfully state to all Farmers, who trade in Washington, that, since his accession to business he has *uniformly* and *steadily* resisted *all* efforts either at *combinations* or *high prices*, as all his friends, and the *dealers themselves*, must bear witness.

On the contrary, he has every season sought to keep the price of Peruvian Guano as near cost as possible, as his advertisements to that effect and the *low* price at which the article has been purchased from his establishment, will testify.

He is aware (and tenders to the public his acknowledgments for the same) that notwithstanding *certain* intendors to the contrary, *his* Guano stands in the *highest* repute among farmers of the surrounding sections of Maryland and Virginia, as always the purest and best article to be had.

As the undersigned has thus far, in his business career, been able to make a living profit on what he has sold, and as he believes every one has the right to regulate his own prices, he now has the pleasure to say, that *for this Spring*, or until the price of the agents of the Peruvian government is changed, *he* will sell for any and all quantities, the *Purest Article of A No. 1 PERUVIAN GUANO*, WARRANTED and INSPECTED, at

$57.00 per 2000 Pounds,

Cash, in current funds.

Farmers *are particularly* assured that the Peruvian Guano sold by *me*, is *all of* the purest character you I receive *more* that does not come direct from the Agents Depot in Baltimore, every *fresh* bearing the *impress of health*.

Farmers are further assured, that I keep *no second class* Peruvian Guano, and that my efforts, as heretofore, will be to keep the price as *low than is possible*.

Bear in mind, that it is *your interest* to buy a *pure article*, at the *lowest price*, at my Guano Depot, No. 519 7th Street, above the Avenue.

SUPER-PHOSPHATE OF LIME,

Manufactured from unburnt Bones, by

BAUGH & SONS,

Wholesale Office and Store,
No. 20 SOUTH WHARVES, between Market and Chestnut Streets, Phila.

Cash Price,

$45 per 2000 Pounds—2 1-2 cts. per lb.

IN the preparation of this valuable Manure, BONES ARE USED IN THEIR RAW STATE ONLY. They have never been sour or calcined. They are taken as nature has made them, crushed with a powerful machinery, and subjected to a process, by which, while all the virtue of the bone is retained, a Fertilizer is procured, furnishing in a convenient and durable form the two indispensible ingredients for the growth of plants and enriching the soil—viz:

Phosphoric Acid and Ammonia.

These two ingredients, by the use of *BAUGH'S RAW BONE SUPER-PHOSPHATE*, are given to the soil in all their *original strength and purity*. They assimilate at once with the soil, furnishing all the needful ammonia for the growing crop, giving it ample nourishment, and leave the land permanently benefitted, so that its presence can be traced for years afterwards. ☞ For sale by

AGRICULTURAL
Implements and Machinery.
SEEDS, &c.
For the Spring of 1860.

THE subscriber, having just returned from his annual tour throughout the New England States, where he is engaged extensively in the manufacture of agricultural Implements and Machinery, would call the attention of Farmers and Dealers in agricultural Implements to his facilities for furnishing them with all articles in that line.

At the North (whence I have just returned) I have made arrangements that will enable me to furnish all goods in my line

AT PRICES BEYOND COMPETITION! CHEAPER tha any House South of New York.

Through the representations and experience of many intelligent farmers, I am introducing in this part of the country several new and important features in Farming Implements and Machinery, as also, new and important improvements on machinery now in use.

I enumerate, in part, Implements and Machinery for this season, as follows:

Plows, &c.

A LARGE STOCK OF PLOWS, particularly Minor & Horton's 3-horse Plow, with wrought Shears, improved by BARTHOLOW.

WHEAT FANS, with balance wheels, a new feature, made expressly to my order.

Corn Shellers, Corn and Cob Crushers
Hay, Straw and Cornstalk Cutters
Horse and Ox Carts, Hay Presses, Churns
Horse Hoes, entirely different from any ever offered in this market.

In fact, every other Machine and Implement used for agricultural purposes.

New Flour & Grist Mill,

that will grind one barrel of flour per hour, or ten bushels of corn meal—can be run with any two or four-horse power.

☞ All Machinery guaranteed, and carefully inspected before leaving my warehouse.

Being thoroughly conversant with all the various branches of agricultural machinery, with 15 years' practical experience therein, it is to the interest of the farming community to purchase their machinery from me, as it frequently occurs in purchasing machinery from persons unacquainted therewith, it is put up in an improper manner, and it more frequently occurs, in the shipment and moving of machinery, that some of the apparently insignificant parts get out of order, which, by the unpractical, is often used served, and when observed, they cannot obviate; hence the accidents and mishaps which render machinery, thus purchased, so unprofitable and expensive to the farmer, as in all cases it is at his risk and expense.

Bone Dust!

Having erected a Bone Mill on Rock Creek, near Flecker's Flour Mill, I am prepared to offer BONE DUST lower than ever offered in the District of Columbia.

Guanos! Guanos!!

Peruvian, Californian, Bartholow's Excelsior Manipulated Guano, and all other Fertilizers constantly on hand, and will be sold on the most favorable terms.

Seeds! Seeds!! Seeds!!!

Orchard, Clover and Timothy Seeds, and all other kinds of Grass Seeds.

ALSO—The largest variety of English, French and American GARDEN SEEDS ever offered in the District.

I feel full to the farming community for their past favors to liberally bestowed, I hope to merit a continuance of the same.
