The Black line **BF** shows the third line of Owings' Adventure
A Stone marked 117 shown as the beginning of Lot No. 117 from which Stone
 James No 174 1/2 pps to Stone at **B** shown as boundary of Lot No. 116 this line is 5.9 pps
 shorter than the distance called for in the Certificate there No 131 pps to Stone
 at **C** standing one perch over the third line of Owings' Adventure, this line measures
 six perches longer than the nominal distance in the Certificate of the Lot which
 is in part to be accounted for by the inequality of the ground, The Stone at
D stands on the third line of Owings' Adventure, from which Stone James No 139 3/4
 C 16 7/2 pps to the beginning this line is two perches short of the nominal distance

No. The Boundaries of Owings' Adventure at **E** and **F** I am induced from every cir-
 cumstance to believe are the true boundaries or at any rate, the ^{best} reported bound-
 aries when the Company had their Lots laid off. It is not to be wondered at that
 the Stone at **C** should stand over the line of Owings' Adventure, in as much as there
 is a considerable attraction on that line from **B** to **C** in consequence of which it is
 with considerable difficulty that a straight line can be obtained from **E** to **F** &
~~that and found to be boundaries of said tract~~
