U. S. 7-30 LOAN.

THIRD SERIES.
$230,000,000.

BY authority of the Secretary of the Treasury, the undersigned, the General Subscription Agent for the sale of United States Securities, offers to the public the third series of Treasury Notes, bearing seven and three-tenths per cent. interest per annum, known as the

7:30 LOAN.

These notes are issued under date of July 15, 1865, and are payable three years from that date in currency, or are convertible at the option of the holder into

U. S. 5-20 SIX PER CENT.
Gold-Bearing Bonds

These Bonds are now worth a handsome premium, and are exempt, as are all the Government Bonds, *from State, County and Municipal taxation, which adds from one to three per cent. per annum to their value*, according to the rate levied upon other property. The interest is payable semi-annually by coupons attached to each note, which may be cut off and sold to any bank or banker.

The interest at 7-30 per cent. amounts to

One cent	per day	on a	$50	note.
Two cents	"	"	" 100	"
Ten	"	"	" 600	"
20	"	"	" 1000	"
$1	"	"	" 5000	"

Notes of all denominations named will be promptly furnished upon receipt of subscriptions.

The notes for the Third Series are precisely similar to form and privileges to the Seven-Thirties already sold, except that the Government reserves to itself the option of paying interest in gold coin at 6 per cent., instead of 7 3-10ths in currency. Subscribers will deduct the interest in currency up to July 15th, at the time when they subscribe.

The delivery of the notes of this third series of the Seven-thirties will commence on the 1st fo June, and will be made promptly and continuously after that date.

The slightest change made in the conditions of this THIRD SERIES effects only the matter of interest. The payment in gold, if made, will be equivalent to the currency interest of the higher rate.

The return to specie payments, in the event of which only will the option to pay interest in Gold be availed of, would so reduce and equalize prices that purchases made with six per cent. in gold would be fully to those made with seven and seven and three-tenths per cent. in currency. This is

THE ONLY LONE IN MARKET

Now offered by the Government, and its superior advantages make it the

Great Popular Loan of the People.

Less than $230,000,000 of the Loan authorized by the last Congress are now on the market. This amount, at the rate at which it is being absorbed, will all be subscribed for within sixty days, when the notes will undoubtedly command a premium, as has uniformly been the case on closing the subscriptions to other loans.

In order that citizens of every town and section of the country may be afforded facilities for the loan, the National Banks, and private Bankers throughout the country have generally agreed to receive subscriptions at par. Subscribers will select their own agents, in whom they have confidence, and who only are to be responsible for the delivery of the notes for which they receive orders.
JAY COOKE,
Subscription Agent, Philadelphia.

Agricultural Chemical Co.'s
CHEAP FERTALIZERS.

THE Fertalizers prepared by the Agricultural Chemical Co., (a Company chartered by the Legislature of Pennsylvania with a capital of $250,000,) have been proved in practice to be the cheapest, most profitable and best, for the Farmer, Gardner and Fruit grower, of all concentrated manures now offered in any market. The Company's list embraces the following:

PARULETTE.—This Fertilizer is composed of night soil and the fertalizing elements of urine, combined chemically and mechanically with other valuable fertilizing agents and absorbents.

It is reduced to a pulverulent condition; ready for immediate use, and without loss of its highly nitrogenous fertalizing properties.

Its universal applicability to all crops and soils, and its durability and active qualities, are well known to be all that agriculturists can desire.

CHEMICAL COMPOST.—The Fertilizer is largely composed of animal matter, such as meat, bone, fish, leather, hair and wool together with chemicals and inorganic fertilizers, which decompose the mass, and retain the nitrogenous elements.

It is a very valuable fertilizer for field crops generally, and especially for potatoes and garden purposes.

Its excellent qualities, strength and cheapness, have made it very popular with all who have used it.

COMPOSITE FERTILIZER.

THIS highly phosphatic fertilizer is particularly adapted for the cultivation of trees, fruits, lawns and flowers.
