(Continued from page 22)

(4) that the city move the park promised 15 years ago.

Over 50 of the citizens met with the Mayor the evening (Tuesday) before the tour. Angry and representing a total of five organizations, they again listed their complaints.

• • •

AFTER THE tour, Mrs. Murphy revealed the Mayor and the city department heads agreed that work will begin to:

(1) Remove obsolete trucks and weeds in the yard of the No. 3 Reedbird Incinerator facing the residents of Reedbird Ave.

(2) That parking regulations be enforced on the residential side of the street to permit thorough, regular cleaning of the street.

(3) That a storm sewer be put to bid so that construction could begin in February for concrete storm drainage and so that work on filling in the land for the park can begin.

(4) That investigation take place immediately for an alternate site for the incinerator outside of Cherry Hill.

(5) That repairs be made to the swimming pool at the Cherry Hill Park, repairs which have gone undone since 1964.

Citizens present at the confrontation included Clarence Jones, president of LaRue Square; William H. Murphy Jr., INCITE president; Clarence C. Jones, Lenox Coles, Mrs. Florence Jackson, Russell Brown, members of INCITE, Mrs. Rebecca Turner and Lee Prsons.

—Public works

(Continued from page32)

Mr. Werner's office has been the addition of colored gang-leaders in the highway department, for the first time.

"One problem, though, is that there is only one colored person on the current civil service list for the job of supervisor," Mr. Werner said.

• • •

THE PRESENT list expires at the end of the year and more colored workers are expected to take the civil service exams to make themselves eligible for the new job opportunities.

The public works chief declared: "we're going to try to report back to CORE in the next few weeks on the results from the Tuesday meeting."

"We've heard this for twenty years, but I'm hoping that this time it will become a reality," said Raymond Clark, local union leader.

Mr. Clark attended the noon meeting Tuesday called at CORE's suggestion, and presented grievances of the men of his union, Local 44 of the State, County and Municipal Employees, AFL-CIO. The meeting was in the Municipal Building.

As president of Local 44, Mr. Clark represents a majority of the 70 per cent colored labor force in the city's public works bureaus.

"It's about time that the City take the lead to correct the racial inequities," the union leader declared.

• • •

AMONG THE changes which Mr. Clark and his membership are waiting for is the naming of Wesley Thomas as a supervisor in the sanitation department, and new gangleaders to be appointed in the bureaus of highways and sewers.

Spearheading the recent naming of gangleaders with the highways department has been CORE's coordinator for job equality, Larry Agrloff, and local CORE chairman Jim Griffin.

"The main emphasis of the meeting will be to measure results on a continuing basis so that progress or the lack of progress being made in each area can be noted," Mr. Agzloff stated.

"We want demonstrable results. We will wait sufficient time, not forever, to see what results appear," he added.

• • •

BOTH MR. WERNER and Mr. Agzloff were hopeful that progress could be made and that no further grievance meetings need be held.

Other points established by the meeting were: a grievance committee set up with Mr. Werner's office and meaningful job training to include more colored workers.

Other results of the meeting to stop arbitrary practices by some supervisors in conflict with department rules, and supervisory and office jobs be opened up to colored workmen.

Also attending the meeting were: Joseph Axelrod, executive assistant to Mr. Werner; Paul Bigbee, in charge of personnel for public works; Edward Moore, head of bureau of sanitation; Birch Kaller, head of bureau of sewers; David Glenn, of the Mayor's office; and Irwin Auerbach, of CORE.

-On wagon

(Continued from page 32)

on the complaint of an Ellamont St. grocery store owner who charged that on July 30 the youth entered the premises carrying a stick and asking for money and drugs.

The wife of the owner however, testified she knew young Caldwell, had always thought him "a good boy" and realized at the time of the incident he "looked kind of funny about the eyes.

• • •

THE HIGH school senior told the court he was carrying the stick to ward off other youths who jumped him.

He said they had cut his hand and he went into the store to get some medicine to put on the wound.

He admitted drinking a quart and a half of beer earlier in the day and, not being accustomed to consuming alcohol, fell groggy.

According to the testimony of Charles Caldwell, his father, the young man, never in trouble before, is one of six children.

His mother has been ill since the incident and the oldest child, age 19, may not be able to return to college because of expenses involved in court hearings, Mr. Caldwell told the court.

Mr. Caldwell, who said he holds down two jobs to care for the family, promised he would see that his son, "never drinks beer again."

He is currently a member of CORE's advisory board and chairman of the board of Christian Education at Waters AME Church.

Endorsements have come from New Era Dem. Club; Mt. Royal Demo Club; City-County Demo Club and Bishop George W. Baber, Waters AME Church.

Speakers at a resent testimonial were Walters S. Orlinski, Chair. BTP board; Mrs. Juanita Mitchell, state NAACP pres. Thomas H. Ward, pres., Mt. Royal Democratic Club; and the Rev. Melvin Chester Swann, committee chairman.

APPLIED PHYSICS LABORATORY
The Johns Hopkins University

The Applied Physics Laboratory, a division of The Johns Hopkins University, operates under contract with the Bureau of Naval Weapons. The laboratory's work is in the fields of guided missiles, rocket propulsion, fuze development and fabrication of satellites for the Navy and NASA, and the test and evaluation of guided and ballistic missile systems are among its principal achievements.

At the present time, the Laboratory has a number of interesting openings for electrical and mechanical engineers, physicists, mathematicians and computer programmers. Specific openings include computer programming, engineering, analog and digital circuit design, structural design and analysis, missile system test and analysis, operations research, and propulsion engineering (ramjet and rocket).

The Laboratory's principal locations are in Silver Spring (a suburb of Washington, D.C.) and in Howard County, midway between Baltimore and Washington. These exceptionally complete facilities contain large-scale computers, well equipped laboratories, libraries, and cafeterias.
