Union Pacific Railroad.

GREAT

UNION PACIFIC

RAILROAD

IS NOW COMPLETED!

The Last Rail Laid!

The Last Spike Driven!

—OX—

Besides a donation from the Government of 12,800 acres of land per mile, the Company is entitled to a subsidy in U. S. Bonds on its line as completed and accepted, at the average rate of about $26,500 per mile, according to the difficulties encountered, for which the Government takes a second lieu as security. Whether subsidies are given to any other companies or not the Government will comply with all its contracts with the Union Pacific Railroad Company. Nearly the whole amount of bonds to which the Company will be entitled have already been delivered.

First Mortgage Bonds

BOUGHT AND SOLD.

By its charter, the Company is permitted to issue its own FIRST MORTGAGE BONDS to the same amount as the Government bonds, and no more. These Bonds are a First Mortgage upon the entire road and all its equipments.

THEY HAVE THIRTY YEARS TO RUN, at SIX PER CENT., and both

Principal and Interest

ARE

PAYABLE IN GOLD.

Such securities are generally valuable in proportion to the length of time they have to run. The longest six per cent. gold interest bonds of the U. S. (the '81's) will be due in 12 years, and they are worth 112. If they had thirty years to run, they would stand at not less than 125. A perfectly safe First Mortgage Bond like the Union Pacific should approach this rate. The demand for European investment is already considerable, and on the completion of the work will doubtless carry the price to a large premium.

Security of the Bonds.

It needs no argument to show that a First Mortgage of $26,500 per mile upon what for a long time must be the only railroad connecting the Atlantic and Pacific States is perfectly secure. The entire amount of the mortgage will be about $30,000,000, and the interest $1,800,000 per annum in gold. The present currency cost of this interest is less than $2,500,000 per annum, while the gross earnings for the year 1868, from way of business only, on an average of less than 700 miles of road in operation, were more than

FIVE MILLION DOLLARS.

The details of which are as follows:

From Passengers,	$1,024,005 19
" Freight,	2,040,233 79
" Express,	51,423 57
" Mails,	136,235 09
" Miscellaneous,	91,626 23
" Government troops,	104,077 77
" " freights,	449,440 33
" Contractors' men,	201,179 09
" " material,	968,430 32
Total,	$5,966,651 61

This large amount is only an indication of the immense traffic that must go over the through line in a few months, when the great tide of Pacific coast travel and trade will begin. It is estimated that this business must make the earnings of the road from fifteen to twenty millions a year.

As the supply of these Bonds will soon cease, parties who desire to invest in them will find it to their interest to do so at once.

A new Pamphlet and Map was issued out, 1st, containing a report of the progress of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application.
