Federal funds for training hard-core

Employers in the Baltimore Metropolitan Area still have time to take advantage of the Federally funded MA-4 training program for the hard-core unemployed.

It provides reimbursement for extra costs under a contract between the employer and the Department of Labor through the National Alliance of Businessmen.

Donald C. Lee, director of the National Alliance of Businessmen for the Baltimore Metropolitan Area announced today that the National Office has established a closing date of April 1, 1969 for the acceptance of MA-4 Job Proposals.

• • •

Under the MA-4 program the Government pays, for example, the extra costs incurred by employers providing remedial education, job coaching, counselling, medical examinations, supervisory sensitivity training and related support services.

A contract for a period of up to 24 months, with payment on a fixed unit-cost basis, can be negotiated.

Any private firm hiring and training certified hard-core people is eligible.

Payment will be monthly and arrangements can be made for firms who wish to establish cooperative programs.

Locally, 22 firms are participating in these contractural agreements which will provide skill jobs for 1,000 hard-core unemployed.

Employers who have considered participation in the program are urged to write to the National Alliance of Businessmen, 1100 N. Eutaw Street.

APRIL 26..

Excursions to the American Museum and Hayden Planetarium in New York City have been scheduled by the Maryland Academy of Sciences for April 26 and May 17. Reservations may be made by calling the Academy at 685-2370.

Hay fever study need suffers

An investigator at The Johns Hopkins Medical Institutions has an unhappy reminder for hay fever sufferers who forget their annoying sneeze-sniffle symptoms during winter months:

Spring hay fever season, linked with the appearance of green grass, is just weeks away.

Dr. Philip S. Norman and a Johns Hopkins colleague, Dr. Walter Winkenwerder, are looking for volunteers who suffer from spring and fall hay fever to help test new medicines for the relief of the disorder's symptoms.

By lining up volunteers [illegible] begin pre-seasonal treatment [illegible] assistance to hay fever. Volunteers, who should be over 18 years of age, will receive about 12 injections at weekly intervals, Dr. Norman said.

He pointed out that in past years about 20 to 25 injections of highly purified ragweed allergens were required for effective treatment.

However, this year they are studying new pollen extracts which have been chemically treated to make them long lasting. "The advantage for the hay fever victim is that the number of injections is cut in half," Dr. Norman said.

Dr. Norman is an associate professor of medicine at Johns Hopkins, and Dr. Winkenwerder is an associate professor emeritus of medicine.

The hay fever studies, which have been conducted by the Johns Hopkins Allergy Clinic since 1963, are supported by the National Institutes of Health.

Prospective volunteers should send a postcard to Hay Fever Study, The Johns Hopkins Hospital.

we care A&P what is the definition of a private brand?

To some people, it is a retailer's own brand created with selling price first in importance and quality second.

To us at A&P, it's the opposite.

Quality comes first.

Value...the best for the least is the rule for our private brands.

If this wasn't true, how foolish we'd be to invest, as we have, literally millions of dollars in processing plants and testing laboratories.

If all we wanted were products we could sell cheaply without quality control, anybody could produce them for us.

The idea of quality private brands isn't new at A&P.

As a matter of fact, it's one of our oldest policies—and by golly, we're proud of it.

Are A&P Private Brands a good reason for shopping A&P? They're one of many.
