CONSUMER CORNER

COMMON SENSE ON FOOD ADDITIVES

Sometimes 'News' does as much to continue as to inform. Food colors, preservative, and vitamins fortification headlines add to the confusion

We honestly believe that our total food supply is wholesome and that additives allow us to eat better and safer food for less money. True some additives would be awful eaten straight but only tiny amounts are used in food. True also that the perfect artificial sweetener or mold inhibitor or color agent may not have been discovered yet. Your best bet is to eat and enjoy a variety of fresh and processed foods (and to read labels and our Pantry Planner when you shop.)

And if you missed our Mystery in the Supermarket pamphlet that described additives and what they do write "Mystery", P.O. Box 7375, Phil. Pa. 19101. Or leave a note for me at your Pantry Pride and save a stamp
