Towson State awards over 2,000 degrees

Dr. Kenneth A. Shaw, vice president for academic affairs and dean of Towson State College addressed the college's 110-th graduating class during commencement exercises June 1 at the Civic Center.

He spoke on behalf of Dr. James L. Fisher, president of the college who was absent to attend his son's graduation.

Dr. Shaw told the 2,500 graduates that the problems and doubts confronting the nation may be the first test for its citizens "as we reach for a new level of national and personal maturity."

Addressing the class as members of "Thomas Jefferson's educated aristocracy of talent," Dr Shaw stated, "you should have strength to fail, the willingness to continue learning, and the ability to listen and understand."

He also urged them to continue their commitment to self-improvement and societal welfare because their responsibilities in solving the problem of in solving the problems of important and profound because of your position as the largest cohort in the population."

Some 8,000 persons attended the ceremonies which featured the awarding of more 2,000 bachelor's degrees and 399 master's degrees.

Mrs. Anne St. Clair Wright, president of Historic Annapolis, Inc. and Dr. Hiltgunt Margaret Zassenhuas, physician, author and nominee for the Nobel Peace Prize, received honorary Doctor of Humane Letters degrees from the college.

OUT OF HOSPITAL — Milton Dugger, Dean of Community Services, College of Baltimore has been discharged from Baltimore County General Hospital. He is resting at home and expects to return to work next week.

Democratic Coalition sets June 8 meeting

The 1975 convention of the New Democratic Coalition of Maryland Inc. will be held at 10:30 a.m. on Sunday, June 8th, at Dining Hall No. 3 of the University of Maryland, Baltimore County, 5401 Wilkens Ave.

Presidential and U.S. senatorial politics will be the major discussions of the day with Stuart Udall, former Secretary of the Interior speaking on behalf of his brother, Rep. Morris Udall's Presidential candidacy.

Also speaking will be Jim Hightower, campaign manager for the Fred Harris presidential effort and former Governor Phil Hoff of Vermont, National Campaign coordinator for Terry Sanford for President.

Potential Maryland Senatorial candidates Rep. Paul Sarbanes (D. 3rd), former Senator Joseph Tydings and City Councilwoman Barbara Mikulski will also address the NDC group.

Other guests include Del. J. Hugh Nichols of the Legislative Study Group and Anne Baker, treasurer of the Democratic State Central Committee.

Other items on the agenda will be a report of the committee for the Future Direction of State NDC and the election of NDC officers.

Individuals interested in attending the convention should contact Coalition President Steve Sirkin at 922-5313.

IN HOSPITAL — Dr. Hayward Harrison, vice president for Development and Public Relations at Morgan State College, is listed in fair condition at Provident Hospital where he was taken Sunday following a heart attack. His brother Myles Harrison principal at William H. Lemmel Jr. High School, who suffered a heart attack last week is improved and recuperating at home.

Shell Information Series: Motor Oil

"Whether you use Shell or not, I can help you get the right motor oil for your car."

By Bruce Boswell, Shell Staff Engineer, Lubricants

Bruce Boswell

You have to know more than a good brand name to get the right motor oil for your car and get all the protection it has to offer.

Motor oil is your engine's life blood. The type of oil you use and the way you use it can help you get thousands of extra miles without a major engine repair.

Oil's enormous job

At 55 mph, each piston in your engine moves up and down inside its cylinder about 35 times a second. It travels about a quarter of a mile for every mile you drive. When you step on the gas, the piston rods push against the crankshaft with a pressure of more than a thousand pounds per square inch.

A film of motor oil thinner than this newspaper page separates these parts and keeps them from grinding each other to pieces.

Besides this lubricating job, a motor oil should clean the engine, help cool it, and protect against rusting and wear. With all this work to do, your motor oil deserves your attention.

SAE 10W, SAE 30, etc. What those numbers really mean

Those are viscosity grades. They tell how thick the oil is. The higher the number, the thicker the oil.

The SAE stands for the Society of Automotive Engineers who set up the grades. The W means it's for cold weather use.

When starting an engine in cold weather, a thin oil like 10W will flow well and protect well. But as the engine gets hotter, the oil gets thinner, and a 10W can't always protect a hot engine.

The opposite is true for a high viscosity grade like SAE 30 or 40. It's thick enough to protect a hot engine, but on a really cold morning it would be too thick. The engine would be hard to start and the thick oil would be slow getting to vital parts.

Multigrades

Multigrade oils, the kind with two numbers like 10W-40, contain chemicals called polymers that make them act like *low* viscosity grade oils when the engine is *cold* and *high* viscosity grade oils when the engine is *hot*.

So why doesn't everybody buy multigrades?

Because single grades generally cost less. And many people can use them satisfactorily, depending on the weather and the way they drive. To find the grades that we recommend for the temperature range in your area, see the chart at right.

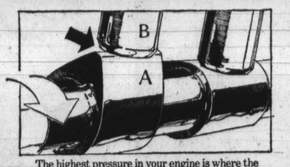
Things to consider when choosing a motor oil

Consider the kind of driving you do. Perhaps a single grade 10W is right for normal winter driving in your area. But on a long highway trip with a heavy load, the engine will get pretty hot even though it's cold outside. You'd need a 10W-30 or 10W-40 for high temperature protection as well as quick winter starts.

The condition of the car can make a difference. If the car is hard to start when it's cold, a low viscosity oil can help it turn over. If your car is an "oil burner", a high viscosity oil can cut consumption. (But get it fixed as soon as you can. It pollutes.)

It doesn't hurt to mix when adding oil–if. If the oil in your engine is right for your car, and the oil you're adding is too, it doesn't make any difference if they're different brands.

Today's cars need not be "broken in" with any special oil. At your first oil change, start off with the right oil for your car, then stick with it.



The highest pressure in your engine is where the camshaft (A) pushes against the valve lifters (B). Here, an anti-wear additive in the oil lays down a thin film that must protect while pressure reaches about 100,000 lbs. per sq. inch.

A good oil doesn't need help from an oil treatment. An oil that meets the car maker's warranty service requirements is designed to do everything your engine needs. Look for "Service Classification SE" on the can.

What oil changes really do

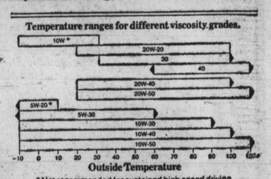
Maybe you've heard a story about a guy who never changed his oil and drove 50,000 miles without a breakdown. Some of those stories might be true for all I know. But I wouldn't try it with *my* car.

The fact is, you play the odds with oil changes.

Today's high quality oils and filters do a commendable job of protecting against the dirt, soot, acid, and other junk that gets into your oil. The oil's detergent properties are so good that about a pound of this contamination can be suspended in your oil where it will drain out at changing time.

But there's a limit to what the oil can do. If you don't change, eventually the additives that suspend dirt, fight wear, and so forth, will be used up, and trouble can start.

So, while you can save a few bucks on oil over the life of a car by stretching between changes, I don't think it's worth the risk.



* Not recommended for sustained high speed driving.

6 basic tips for getting the most from a motor oil

1. **Don't idle to warm up.** In a cold engine the fuel-air mixture is rich, and unburned gasoline can get into the oil. The fastest way to warm up is to drive off right after starting. But take it easy for the first few miles.
2. **Group short trips together.** If you group trips together, one right after the other, the oil will get hot, and heat fights the build-up of sludge and acids.
3. **Change oil regularly,** at least as often as directed by your owner's manual. If you drive under severe conditions, (and stop and go driving is one of the worst) change twice as often.
4. **Change oil filter at least every other change.** If you don't change the filter, it can plug up and allow unfiltered oil to circulate.
5. **Don't let the oil get too low.** Have it checked when you buy gas, and check it yourself when you stop at a self-service station.
6. **Keep your engine tuned.** A poorly tuned engine can contaminate its oil with a lot of soot or unburned fuel.

Now some information about Shell motor oils:

Check the Shell line-up for the right motor oil for your car.

Shell X-100® motor oils are available in single grades SAE 10W, 20W, 30, and 40. Each offers the protection you need for its temperature range. And each meets the warranty service requirements of every U.S. car maker. And most foreign cars.

Shell X-100® Multigrade motor oil is an SAE 10W-40, an all-season oil offering excellent high temperature protection plus good low temperature startability. Its patented formula fights sludge and other contaminants that can harm your engine.

Shell Super X® motor oil earns the 10W-50 rating, the widest multigrade range you can buy. If you want even greater high temperature protection than Shell 10W-40, this oil is for you.

With proper care and a top quality motor oil (and Shell Super X is our finest) we believe that most of today's newer cars can be expected to go 100,000 miles without a major engine repair and with no appreciable sacrifice in performance.

Any questions? Write me.

Send them with your name and address to: Bruce Boswell, Staff Engineer, Shell Oil Co., P.O. Box 61609, Civic Center Station, Houston, Texas, 77208.

U. of Md., Arena Players come to rescue Orchard Street Church

By Elizabeth M. Oliver
City Editor

ORCHARD STREET CHURCH, the church built by torchlight by slaves some 150 years ago will soon see new life. Many citizens are coming to the rescue to get restoration funds.

THE UNIVERSITY OF MARYLAND BALTIMORE administration, faculty and students plan several benefits.

THE JUNE 4 meeting reveals that U of Md. Baltimore has officially endorsed the "Adopt Orchard St. Church" project "from the top". Enthusiastic leaders are Louis Green Ron Lantz and Maryanne Hershel. Walter T. Brown, is the U of Md. P.R. exec.

CONTRIBUTORS who sent generous money in the mail: Lloyd Cox, Doris Green, Muriel Mason and Margaret Payson.

NO MATTER HOW SMALL, your gift of cash is tax free.

ADDRESS: COMMITTEE FOR PRESERVATION OF ORCHARD STREET CHURCH, P.O. Box 13534, Baltimore, Md. 21203. Norman Ross of the Dunbar High School faculty is coordinator.

THE ARENA PLAYERS, INC. is planning a benefit performance with all proceeds going to the Commission for the Preservation of Orchard Street Church headed by Mrs. W.A.C. Hughes.

MEMBERS OF THE ARENA PLAYERS, nearby the Orchard and Druid Hill church term themselves "good neighbors" as they sponsor "An Evening With Mary Carter Smith."

Mrs. Camilla Sherrard, chairperson, the board of directors; Mrs. Mary Marrow, president of the ladies auxiliary; Samuel H. Wilson, president and Irvin Turner, managing director all of Arena Players are unanimous in desire to help Orchard St. Church by sponsoring a benefit performance "An Evening With Mary Carter Smith". Details are forthcoming.

The group says we firmly believe the community will help in this good cause.

"Good neighbors help in troubled times. Orchard Street Church is having troubled times.

"The church sits like a once-loved beauty deserted, now that she is old.

"The loyal group, headed by Mrs. Hughes is fighting to restore the building.

THIS BICENTENNIAL YEAR is a fitting time to let everybody know that we, who are black, are proud of our visible history.

"Yes, there are whites who have, as we say, "put their money where their mouth is" and have contributed.

"There are some blacks who have responded to the plea for the money needed to restore and preserve this great church.

"But we are far short of our goal. We can talk, but cannot get results without money. For money speaks with a loud voice.

"Happily, the Arena Players is coming with help".

INTERESTING COUPLE

MR. AND MRS. PRINCE PETERKIN, 1425 N. Ellamont, just returned from a 17-day jet tour of Europe, London, Paris, Switzerland, Florence, Venice, Rome. Wed 24 years, the couple has taken six ocean cruises and plans more.

Mr. Peterkin, a cab driver 16 years reports Angela Davis is "really rocking Europe".

YOUR HEART would have dripped bitter blood to see a group of family men outside an employment agency last Friday evening, waiting for their checks. All were depressed and hurt.

They informed us they had worked since dawn and were told to return after the job for their money. The agency doors were locked, not to return until Monday morning. When asked, one of them replied, "My kids are home, hungry, waiting for me to buy food. I don't have a cent."

SUMMER ART CLASSES are set for young people 5 to15 years by the Baltimore Museum of Art. The classes are a delightful experience which will hold memories for your children all their lives. Call 396-6320 for information.

THE MUSEUM SHOP has interesting gifts and summer jewelry.

WORD IS that a daily reporter, Welford L. McLellan, will be as of July 1 director of Public Relations at Morgan. Assistant is Roman Hankewycz, former AFRO City Desk reporter-photographer. As of June 1, Joseph H. McIver is on the PR staff as sports information man.

MORGAN'S James H. Murphy says if anyone near the campus has extra rooms, they are needed for off-campus students. Call him at the Morgan Housing Office-893-3217.

IF YOU RENT-A-ROOM to a student you can help the youngster who is away from home and in addition help balance your budget.

ORCHARD ST. CHURCH
Resurrection Day coming

WATCH YOUR MOUTH A SPEECH PATHOLOGIST reports in an UPI release that persons who say "uh" and "you know" and "I'm confused" and "what I'm trying to say" are merely "buying time" and have limited vocabularies.

The absence of sufficiently broad vocabularies, the Los Angeles researcher says, is probably because of limited education and the fact that the person's parents had limited verbal capacity.

The time-buying habit is passed on to youngsters who really get their speech habits from home.

USE OF POOR LANGUAGE also designated limited education and vocabulary.

BLAMED for children's reading habits are the teachers, according to New York researchers.

They say "Old Prune Face" teachers give kids "jangus" and should not go into reading classrooms.

Both reports were given at the 20th Annual International Reading Asso. in New York.

THANKS

THANKS TO YOU, all readers of "For All We Know"

For example, Mrs. Mariam L. Winborne says, "I have been a reader and admirer of the column which is concise yet contains so many human interest stories. These stories relate to the on-goingness of the community in a positive light."

Others have written "For All We Know" has the little bits of information we can read quickly".

GREATEST compliments come from AFRO employees who ask each week what's in "For All We Know" this time?

RX FOR HEALTH is in Dr. Peter Kwiterovick's article on heart attack and coronary disease. Low cholesterol intake may reduce "kicking the bucket" because of your tickers going bad.

HOWEVER, long life can be assured if you eat those foods upon which you were reared as a child. Whatever you are accustomed to, will never hurt you.

FOR EXAMPLE, if you had chicken and dumplings Sundays as a child, you

BY THE WAY...

by Joe Black

The state of the nation's economy today is a big question mark in the minds of many.

Some see it as a bona fide depression. A hungry period, harking back to the bleak times of the early 30's.

Others, more optimistic, are calling it a recession. A necessary period of economic adjustment, to squash the upward spiral of inflation.

Nobody, however, is telling it like it is. Telling it as a time of reassessment. A reassessment of lifestyles. Of values. Because today's economy is truly a time that's touching everyone. Blacks and whites alike.

But you know, maybe this is a time of opportunity, especially for Blacks.

An opportunity to look at a lot of things we give lip service to, then often overlook as we go our merry ways.

Things like, what can we do now to prepare ourselves for better tomorrows, for better security for all of us.

One bright answer to that is simply to work harder to encourage our people to arm themselves right now with better educations and skills. Both of which will enable us to compete for jobs on a firmer footing, when the employment picture clears up.

Another thing we can do is look sharply at our lists of priorities. Is a big, new car really that important? Or being one of the ten best dressed?

Or, do troubled times teach us to save money for future comforts—and maybe spend a little now to help less fortunate Brothers and Sisters?

Maybe it's time for us to turn the bad times into good times. For ourselves.

And for others.
