wearing women's clothing and are addressed in court as women.

Charged with murder and robbery are, Michael L. (Lisa) McCree, 21, 2000 block N. Calvert St., Robert (Verna) Dixon, 21, 1700 block N. Calvert St. and John (Theresa) Garris, 22.

• • •

Police testified Mr. Friedenberg's deteriorated body was found July 11, 1974 locked in a closet.

His hands were tied behind his back and his ankles tied with cord and a wire around his neck.

Police stated Mr. Friedenberg was reported missing from home by his wife.

Police reported Friedenberg apparently picked up the defendants, who were hitch hiking and dressed as women. Police revealed the victim went with the defendants to the apartment where he was killed.

Thomas told the all-female jury he had lived with Dixon in the 1700 block N. Calvert St. and Dixon always dressed as a woman.

Thomas told the jury when he arrived home from work on July 8, the three defendants were at his apartment. He testified he noticed some blood on the floor but "Michael said he had dropped a bottle and cut himself."

According to the witness' testimony, "Verna (Dixon) and McCree told Thomas they were going to New York for a few days.

Police report the defendants drove the victim's car to New York. McCree was arrested by the New York police on a fugitive warrant while he was staying at the Strand Hotel on 43rd St. in Manhattan.

• • •

After the men left for New York, Thomas testified he stayed at his apartment and did not notice anything unusual.

The witness told the jury when he returned home from work on July 9, "he smelled an odor in his apartment but thought it was coming from the trash outside."

Continuing to testify, Thomas said, "the odor was strong the next day when he came home from work and he noticed flies were in the apartment and his neighbor had put his windows up because of the smell.

However, Thomas revealed to the jury "I still did not know where the odor or flies were coming from. I had put the windows down but there were still flies in the apartment.

"The odor was very strong in my bedroom on July 11, and I started searching the apartment. There was a nest of flies near the kitchen sink and I saw the closet in the kitchen had been nailed up."

Thomas told the jury he pulled several nails out and "saw something was in the closet. I went next door and called the police."

The witness testified the closet under the kitchen sink was never used while he lived at the apartment with Dixon.

U.S. attorney subpoenas Mandel papers

ANNAPOLIS (UPI) — Gov. Marvin Mandel disclosed Thursday that records held by his personal accountant have been subpoenaed by the U.S. Attorneys office, apparently in connection with the government's investigation of Maryland Political corruption.

• • •

Mandel said his accountant, whom he would not name, prepared his tax returns in recent years and possesses other personal records, but the Governor said he has no idea what the U.S. Attorney is looking for.

The disclosure of the subpoena came within three weeks of a Washington Post story that said Mandel has become the subject of the same 2-year-old investigation that forced Spiro T. Agnew to resign the Vice Presidency.

CCB gets $45,000 grant for one-year course

The Community College of Baltimore has been awarded a $45,000 grant by the Department of Health, Education and Welfare to conduct a one-year course leading to certification in the special education field of Communication Aide Training.

The federal grant for the Communication Aide program came from a joint effort of the CCB and the Baltimore Public Schools Department of Exceptional Children, Robert T. Rinaldi, executive director.

• • •

The training program at CCB, now in its second year, is a national model which trains graduates for work as paraprofessionals for exceptional children.

Communication aides work with children having speech, language and physical handicaps, hearing and visual impairments, and learning and developments, disabilities.

CCB is presently registering students for the program for the fall semester. Students who successfully complete the program can find employment in health agencies where services are provided for the handicapped, hospitals, schools, rehabilitation centers, clincs, nursing homes, and day-care centers.

• • •

The 30-credit certificate program, limited to 25 students who must meet specific requirements, involves both classwork and practical field work.

• • •

Students learn the basic functions of an assistant, such as recognizing communicative disabilities, administering tests designed to evaluate special problems, planning programs to remediate the identified problems and executing remediation techniques for those problems.
