Group to train youth to fight crime, rodent

An innovative plan to combat juvenile crime and rodent will be presented to the public by the Youth Diversion Project, Saturday, Feb. 21 from 2 p.m. to 4 p.m. at the Steuart Hill Elementary School, 30 South Gilmore St.

The purpose of the plan is to involve participants of the COIL Youth Diversion Project in a process of community self-help. Young people will be taught most effective way to fight rats is to attack their hiding places and their food supply.

Youth will be guided to protect their own homes first by cleaning up trash piles, open garbage, uncut hedges, high weeds and dirty yards.

The Health Department will provide training on the identification and reporting of such problems. The youth will be organized to assist the elderly and disabled in home and yard care.

Negligent and irresponsible home owners will receive notices of health code violations from Health Department Enforcement Officers. If notices are not complied with, a citation to appear in court is issued.

Control standard set for kepone

Harvey A. Epstein, Maryland Commissioner of Labor and Industry, has announced the adoption of a temporary emergency standard on kepone effective Feb. 11.

The standard is designed to protect the health and safety of workers up to a 10-hour workday, 40-hour workweek over a working lifetime. Compliance with the standard should prevent adverse overt effects currently reported from exposure to kepone (chlordecone) in the workplace, and materially reduce any risk of cancer from occupational exposure.

• • •

Commissioner Epstein said, "It has been estimated that about 87,000 pounds of kepone (chlordecone) remain in the United States out of approximately 3,500,000 pounds of kepone produced and shipped into the Allied Chemical, Race Street plant in Baltimore between 1959 and 1975. 33,115 pounds of this kepone remain in storage at the Allied Race Street plant. Additional quantities, mostly as an ant and roach bait containing one-eight of one per cent kepone, are presently in the stocks of distributors and pest control operators within the State of Maryland."

The standard provides for permissible exposure, monitoring, methods of control, respiratory protection, and personal protective equipment. The standard requires posting of signs, medical surveillance, record keeping and filing of reports.

The entire standard will be printed in the March 3 issue of the Maryland Register. At the present time, copies may be obtained by writing: Dr. Oneil Banks, Division of Labor and Industry, 203 East Baltimore St. Baltimore Md. 21202, or by calling Dr. Banks at (301) 383-6840.

Center to train minorities

An institute on board training and processes for minority or low-income persons to assist in increasing their effective participation in community organizations, has been announced by the Voluntary Action Center of Central Maryland.

This special board training program, which was developed through a grant from the National Center for Voluntary Action, will take place on six consecutive Wednesday evenings from March — to April 9, at Antioch College, 535 St. Paul Place.

• • •

Training will consist of six two-hour sessions. Subjects include: maintaining a community organization; board and committee structure; parliamentary procedure; the importance of boards and Teisponsibilities of board membership; reporting procedures; listening and communication skills and board observation techniques.

The sessions will be led by professional trainers with expertise in working with community groups. A certificate will be awarded to those people who successfully complete the institute.

Enrollment in the institute is limited to 25 persons, with no more than two persons from any one community group. Each previous institute has been quickly filled and VAC urges those who are interested to contact Betsey Morrison, director of Training at VAC, 467-1600.

FEB. 27

"Divine Law, Source of Human Rights," is the topic of a public meeting sponsored by the Baha'is of Baltimore County East to be held on Friday, Feb. 27 from 8 to 10 p.m. at the Quality Inn at 1015 York Road in Towson. The speaker is Kiser Barnes, a prominent Baltimore lawyer with Foster and Barnes law firm.

SGT. GREGORY R. STEWART, son of Mr. and Mrs. Clinton (Ernestine) Stewart, assigned to the 123rd Second Battalion of the U.S. Army in Germany, has been selected the most outstanding non-commissioned officer in his company based on his personal appearance, military bearing and knowledge of current affairs.

NAACP urges support for HB 1166

The Baltimore branch of the NAACP has called upon citizens to press for the passage of House Bill H.B. 1166 which seeks to have members of the school board elected.

"We believe that H.B. 1166 which was introduced by Isaiah Dixon and Lena K. Lee provides for an effective method of securing a non-partisan elected school board here.

'Over 90 per cent of all public school boards in our nation are elected. Such boards tend to be more sensitive to the educational needs of the citizenry. Furthermore, the elective process demands increased citizen awareness of conditions and problems in education and increased responsibility and input from the consumer public."

SECOND LIEUTENANT Grant H. Hughes of McKean Ave., has completed a Race Relations Unit discussion leader class at Ft. Lee, Va. where he will be one of the unit's equal opportunities seminar instructions

Helps Shrink Swelling Of Hemorrhoidal Tissues Due To Inflammation. Relieves Pain & Itch.

...Gives prompt temporary relief from hemorroidal pain and itch in many cases.

Doctors have found a remarkably successful medication that actually helps shrink swelling of hemorrhoidal tissues when infected and inflamed. And it does more. In many cases it gives relief for hours from pain and itching in these tissues. Tests by doctors proved this true in many cases.

The medication used was Preparation H. And no prescription is needed for *Preparation H*® Ointment or suppositories.

'Enriched Flavor'™ Entry Outdates Conventional Low Tar Cigarettes.

New flavor discovery for 9 mg. tar MERIT achieves taste of cigarettes having 60% more tar.

Now there's a way to cut tar without the usual loss in taste.

That's the report from Philip Morris on a new taste discovery called 'Enriched Flavor'. *A way to pack flavor—extra flavor—into tobacco without the usual corresponding increase in tar.*

The kind of flavor that outdates conventional low tar brands.

The cigarette with 'Enriched Flavor' is remarkable new MERIT.

If you smoke—whether it's a low tar brand with a taste you can't quite get used to, or a full-flavor smoke you enjoy but with a tar level you'd like to drop—you'll be interested.

Smoke "Cracked": Key Ingredients Isolated

After a twelve-year research effort, a team of scientists at our Richmond Research Center succeeded in isolating the "key" flavor ingredients of tobacco as they exist in cigarette smoke.

By adding only those ingredients which are of extreme high quality as flavor producers yet low tar producers as well, we're now able to pack incredible flavor into a cigarette without the usual corresponding increase in tar.

'Enriched Flavor'. It's extra flavor. Natural flavor. Flavor that can't burn out, can't drop out, can't do anything but come through.

We packed 'Enriched Flavor' into the tobacco used to make MERIT.

And began an extensive series of taste tests. The results were startling.

Taste-Tested By People Like You

9 mg. tar MERIT was taste-tested against five current leading low tar cigarette brands ranging from 11 mg. to 15 mg. tar.

Thousands of filter smokers were involved, smokers like yourself, all tested at home.*

The results were conclusive:

Even if the cigarette tested had 60% more tar, a significant majority of all smokers tested reported new 'Enriched Flavor' MERIT delivered more taste.

Repeat: delivered more taste.

In similar tests against 11 mg. to 15 mg. menthol brands, 9 mg. tar MERIT MENTHOL performed strongly too, delivering as much—*or more*—taste than the higher tar brands tested.

You've been smoking "low tar, good taste" claims long enough. Now you've got the cigarette.

MERIT. Incredible smoking pleasure at only 9 mg. tar. From Philip Morris.

MERIT and MERIT MENTHOL 9 mg. "tar" 0.7 mg. nicotine

*American Institute of Consumer Opinion. Study available free on request. Philip Morris Inc. Richmond, VA 23261.

9 mg. "tar," 0.7 mg. nicotine av. per cigarette by FTC Method.

Warning: The Surgeon General Has Determined That Cigarette Smoking Is Dangerous to Your Health.
