"ELECT PAUL SARBANES TO THE U.S. SENATE. HE HAS MY UNQUALIFIED ENDORSEMENT."

Congressman Parren J. Mitchell
April 30, 1976

"I urge strong, united support to elect Paul Sarbanes to the United States Senate. He has my unqualified endorsement.

As his colleague in the Congress for the past six years, I have had the opportunity to work closely with him and to observe first-hand his deep commitment to fighting for legislation and programs to help people. He has consistently voted and fought for jobs, education, health care, human rights and civil liberties. On issues of special importance to the black community, Paul has consistently received one of the highest ratings from the Black Congressional Caucus.

At a time when many public officials and politicians are backing away from programs to help families and poor people to meet today's pressing economic and social problems, Paul has stood firm. He is in the forefront of the effort to enact such crucial legislation as the Humphrey-Hawkins Full Employment and the Kennedy-Corman National Health Insurance bills.

Paul understands and responds to the problems which most deeply concern and affect our community. In the U. S. Senate, we will be able to call on him and count on him.

Please join me in working hard on his behalf and voting for him."
