Blocks on the Move

By Arnetia Lottier

Clean Blockers attended the second planning meeting of the 42nd Spring and Summer AFRO Clean Block Campaign last Friday. The program for the summer session was presented including dates for the Clean Block meetings and dates for movie parties. (See schedule on this page). Dates for the Orioles baseball games will be given at a later date.

Each captain was urged to bring in as many blocks around them as possible in order to reach our goal of 500 blocks.

All Clean Blockers are asked to have their blocks in tip top shape and have their AFRO Honor Flags map by July 4. They were dayminded International monitors will be visiting each city as part of the bicentennial celebration. It is hoped they will visit Colts AFRO Clean Blocks next their tour.

For Mrs. Katherine Matsetewa, Baltimore Health Department was guest speaker at the meeting. She spoke to Clean Blockers about the danger of rats in our community. She said one rat produces from 50 to 75 rats per year. In four months after the birth of a rat it is ready to reproduce. A grown rat weighs one pound and is 15 inches long from head to tail.

The need for people to be clean where they live is urgent if we are to rid the city of dangerous rats, Mrs. Matthews said. Most people do not realize the danger of rats to humans.

They not only bite but many diseases are caught from rats. If you should accidently run your hand over rat urine it can give you a terrible disease that makes you break out all over.

Mrs. Matthews explained to the Clean Blockers how neighbors can be made to clean up their yards and fronts, refrain from putting garbage in plastic bags and leaving it around for dogs and rats to tear them open. She said there is a law which requires people to clean up, if they don't they can be fined. This comes under the Health Department. A law is also in the making where residents will be responsible for one half of their alleys.

Clean Blockers who have problems in their blocks that pertain to health are asked to call the Clean Block office 728-8200 and we will contact Mrs. Matthews.

There was a discussion period where the Clean Blockers talked to Mrs. Matthews about problems in their blocks.

Before closing the meeting, Petunia and Marigold seeds were distributed to the block captains.

Captains or advisors attending the meeting were: Ms. Khadeeja Faton Mata, 900 N. Gilmor St.; Mrs. Esther Middleton, 500 W. Lafayette Ave.; Mrs. Dorothy Phillips, 1400 E. Lanvale St.; Mrs. A. This much needed drive helps rid our surroundings of unsightly litter and filth... Each year it is necessary to establish a Clean Block Prize fund to buy paint, flowers and window boxes for needy blocks and reward the youngsters at the close of the campaign.

Can we count on you to play an important part again this year? All contributions will be acknowledged in the AFRO on the Clean Block page. Make all checks payable to AFRO Charities; it's tax deductible.

VD is a serious problem in Baltimore

The Alliance Against Venereal Disease reports VD is "number one enemy among communicable diseases and growing fast."

A group of citizens and community groups met Tuesday to discuss ways they could assist the Health Department in overcoming the city's sexually transmitted disease. Mrs. Mary Clayburn served as the interim chairman.

Mayor Schaefer described VD as "A serious problem that the city must handle." The venereal diseases, commonly known as VD, are those diseases spread from one person to another, practically always by sexual contact.

* * *

Syphilis and gonorrhea are the two most serious venereal diseases. In 1975, over 23,000 cases of syphilis and gonorrhea were reported and the individuals were under the age of 30.

If you suspect you may be infected, take a positive attitude. Don't be afraid or feel sorry for yourself, do something about it.

Remember, statistics show more than 2,200,000 people catch gonorrhea each year and about 500,000 are now infected with syphilis.

* * *

Syphilis and gonorrhea together strike one person every 14 seconds. Almost 500,000 teenagers catch venereal diseases annually.

See a doctor or go to a free public health clinic at once. It s the only way you can be sure not to expose others. Your doctor can give you a blood test for syphilis and give you a definite answer. He can also check for signs of gonorrhea and test for gonorrhea infection.

Help others get cured by spreading the word and help stop the spread of the disease. VD must be controlled and stamped out. Syphilis and gonorrhea have damaged thousand of Americans each year.
