By the way...

By Joe Black

For the past three decades Black people have been shouting and inferring that we have gained increased pride in our heritage and culture. But is that fact? Or is It just talk for show?

You see, way back when a college education was almost an impossibility for Black people, they gained hope when Cheyney opened its doors in 1839. And Lincoln University offered educational opportunities in 1854. In 1865 the churches recognized the need for ex-slaves to learn readin', 'ritting, and ciphering, and with the help of The Freedmen's Bureau, they founded Howard University, Fisk University, Tougaloo College, St. Augustine College, and Morgan College, to name a few institutions of higher learning.

It's a fact! When Black folks needed them, the Black colleges welcomed them and gave us many of our great doctors, scientists, lawyers, and educators. But as the saying goes . . . how soon we forget. Today, when many of these Black schools need the support of Black Americans, we are giving them "lip" service rather than the financial support that they need. My friends, many of these Black institutions of higher learning are facing extinction. Black America is not a welfare state; we have annual gross spendable income in excess of $130 billion dollars. That is a definite indication that we can and must help our own community and its centers of education and culture.

But too many of us are busy doing our own thing: Young Blacks have accepted the fallacious belief that you can't learn anything in a Black college except how to party or play ball; while middle and upper income class Black families seem to have adopted the attitude of "I got mine, shame on them if they don't have theirs."

We have arrived at the time when we must replace rhetoric with money. Each graduate from a Black college or university should mail a minimum of twenty-five dollars ($25.00) to their alma mater each year. You know the school that we save may be your own.

Dr. Randall J. Craig exhibit at Morgan Gallery of Art

By Sunday Tenabe & Art Adkins

Dr. Randall J. Craig, the 1955 Morgan State University graduate who specializes in sculptures that are distinguished by their lifelike qualities, is exhibiting 16 of his unique creations in the Gallery of Art at Morgan State University.

Describing Dr. Craig's work, Dr. James Lewis, director of the Gallery and Henry O. Tanner, Professor of Art, says "some people have called Dr. Craig an instrumentalist in the sense that his sculptures have some message for everyone. This is essentially true...in the current showing of his work, there are some pieces that will speak to you and some that will not, but there are also some pieces that will speak to each and every one of us.

While it is true that Dr. Craig is a figurative artist, there is also an aspect of abstractionism within his work. There is also a definite relationship between his work and the everyday world because you will see your neighbor, your wife, your friend and perhaps even yourself as you stroll through the Gallery. You may see him or her or yourself carrying a rifle, in black or white, in high or low relief... but you will see somebody!"

James Lewis (L) with Dr. Randall J. Craig with two of his former Morgan students now graduates, Miss Cynthia Bell Powell and Steve Miller at Sunday reception.

Currently, Dr. Craig is an associate professor of art education and the coordinator of the Art Education Program at the University of Maryland, College Park. A native Baltimorean, he graduated from Morgan State University and went on to earn a Master of Arts degree in painting and sculpture from the Tyler School of Art at Temple University.

Culminating his education, he earned his doctoral degree in art education at the University of Maryland, College Park. He has done advanced studies in African art, literature and music at the University of Ghana.

Additionally, he has served as an art department chairman of public schools in Philadelphia and has served on the faculties of Rutgers and Morgan Universities.

His sculptures have been exhibited throughout the Middle Atlantic area and have merited numerous distinguished awards. Dr. Craig has also been commissioned to sculpt several memorial works for public buildings.

Dr. Randall J. Craig's exhibit at Morgan State University will continue through Nov. 2. Please call the Gallery of Art (301) 444-3030 for additional information.

Historical photos at Maryland Trade Center

Maryland Time Exposures, an interpretive exhibition including 175 photographs taken in Maryland before 1940, will be on display in the lobby of the World Trade Center in Baltimore during October 1984.

The traveling show was organized by the Maryland State Archives as part of the celebration of the 350th anniversary of the founding of the state and coincides with the publication by the Johns Hopkins University Press of Maryland Time Exposures, 1840 - 1940 by Annapolis authors Mame Warren and Marion E. Warren.

The exhibition includes many photographs which are not included in the book, however. Research by the authors unearthed more than 2,000 important visual records of Maryland's heritage, too many for a single volume. The show was conceived by the Warrens as a way to bring to the public's attention more of the wealth of fascinating images they discovered during the two years they compiled the book.

The show consists of twenty 4 x 8 foot panels with some of the images printed almost four feet wide. Many have been printed by Marion E. Warren from the original glass plate negatives, resulting in images of extraordinary clarity and quality. Accompanied by captions rich in historical information, the exhibition considers such varied themes as Railroads, Water Transport, Sports, Family Life, Cities and Towns, and Patriotism, Politics and Parades.

A 24 - page illustrated catalog has been prepared as a permanent record of the event, and may be obtained from the Maryland State Archives, Post Office Box 828, Annapolis, Maryland 21404.
