religious teachings, he decided to challenged the ex-wife in court. Now, one might say how can an ex-spouse have any say over what goes on in another household. The answer is yes, he can have a lot to say since they are his children too.

Live-in-boyfriends or vice versa, can either have a positive or negative effect on children. Children look to their parents for guidance. Children imitate their parents. If a child is subjected to a household where the mother or father constantly has women or men living in the home, children begin to identify with that lifestyle.

As a parent, look at how your children are relating to you as a parent.

If you had been married for a long period of time and your children are quite attached to the absentee parent, their feelings (the children's) will be hurt if the parent begins to carry on many, many different relationships without any regard as to how this will affect them.

On the other hand, if you have a live-in mate, who is conscious of the feelings of your children, and that person is someone with whom you have lived with for a long time, and the children like and get along with them it may not affect them negatively.

But the revolving door syndrome, live-in-relationships that last only 2-3 months, is very damaging to children.

Let's face the facts, as a parent you have already lived your life. It is your responsibility to provide for your children a stable household, regardless of your own secret desires. If you want them to grow up to be responsible adults and citizens, then the lessons must start at home.

Don't let your children be kidnapped by the corruption on the streets and what's shown on TV. Be discrete in what you do. Because if you show respect for your children, they will in turn show respect for you.
