Ans: Yes Sir, to pay the interest on the 643$ note & to give my sister $73.75, and what remained over ($14.82 was to go on the account he owed me

4th Int: Look at "Exhibit P." and explain the same line by line?

Ans: I look at "Exhibit P" now here shown me - $3593.00 represents the principal due me by Lawson H. Main - The next line, $215.58 represents the interest for one year - The next line $77.21 represents interest received by me - The next line represents the balance of interest then due in the year 1870, $138.37. The next line $215.58 represents the interest for the year 1871, which makes $353.95 interest due in 1871 - The next line $118.50 represents the money collected on the Sauner & Smetzer sale notes. The next line $235.45 represents the balance of interest due after deducting the Sauner and Smetzer notes - The next line $13.40 represents a meat bill of my mother's paid by Lawson H. Main to Mr. Hagan - The next line $222.05 represents the remainder of interest due after deducting the last meat bill - The next line $125.00 was received from Lawson H Main - The next line $97.05 represents the balance of interest due after deducting the $125.00 aforesaid - The next line $21.31 represents my mother's meat bill which Lawson Main paid - The next line $75.74/100 represents the balance of interest due at the time when Lawson H Main & I settled in April 1874 - As an explanation of the figures written the lines, the interest on the 643$ note was $77.16, for two years; out of the $165.80 check I was to have $92.05 - I was to give a credit of $77.16 on the 643$ note & the $14.82 was to be credited on the $75.74 account for interest - That left $60.85 due me on that interest account

5th Int What was said in reference to crediting the $92.05 referred to by you and Lawson at the time this settlement was made?

Ans. Well, he said I should give him credit for two years interest on the 643$ note and I should give Charlotte $73.25 and the remaining $14.82 I should credit on his back interest account - At first he said that he wanted it to go on the Mortgage note & I told him I was not satisfied for it to go on there, I wanted it to go on the 643$ note. He said, "he saw what I was after, I should put it on the $643 note, was all right" & he counted up every thing, looked over "Exhibit P" - and said it was counted up right - So he put the figures $75.74 in the corner within the pencil lines & subtracted $14.82 from it, which left $60.85 which he yet owed me, and said, he would pay it directly after harvest - He did not pay it as he promised

6th Int Are you, or not, acquainted with Lawson H. Main's handwriting & figures?

Ans. Yes Sir

7th Int: Look at "Exhibit D." and state whose figures & writing it is?

Ans: Lawson H. Main's.

8th. Int: Did or not, L. H Main, at any time, give you a note in settlement of interest? If yes, state when & for what years interest, & what became of said note?

Ans Yes, In 1873, for the first year's interest on the Mortgage note, & when he came to settle, in 1874, I asked him to get another name on that note - He said, he would not get one, but would take up the note
