tell exactly.

21st Int. How long did you continue to haul for said Complainants?

Ans. I hauled for two years & over off and on.

(Excepted to as leading,) 22d Int. Were you to be allowed in the paying for the House anything else besides the hauling you were to do for the said Complainants? And if yea, state what you were to be allowed?

Ans. I was allowed to give him anything that he could use. He got some beef for his hands & himself, and some tallow to use in his shop, or anything that he got of me for his use, and allow my account in bar of Payment of the House.

23d Int. Was there any Partition Changed in the House by Waesche? And if yea state what took place between Waesche and yourself in Reference to said Change

Ans. Yes. Sir: The studding for Partition was put up in the wrong place. He tore it down and put it up at the right place in the plan of the House, that's all about it. There were two Partitions to run clear through the House, I didn't have the one Partition to extend further than the Dining Room and I was to have credit for that much Partition.

24th Int. In the plan of said House was there a back Stairway?

Ans Yes, Sir.

25th Int. Was there any extra Door and Frame put in said Building

Ans. No. Sir;

26th Int. Was there any extra work done to said Building by said Complainants not embraced in the Contract spoken of by you?

Ans No, Sir.

27th Int. Was said House finished and completed according to your contract with Waesche? If no, look at said Exhibit "J.W.S" and point out specifically all deviations from said Contract?

(Exhibit J.W.S. herewith filed and returned by Comm)

Ans. No Sir. I look at Exhibit J.W.S. marked shown me on page 84, of said Exhibit J.W.S. is the plan of the House spoken of in my answer to the 3d Interrogatory The Contract was that Waesche was to put up a Frame House 34 feet square, 9 Rooms, the stories to be 9 feet high, Veranda and oval windows and box window frames We failed to make the windows oval and hang them on rollers, and he was to give it three coats of paint, and only gave it two & didn't put in No. 1 Lumber as the contract was, and he did not do the work in a workmanlike manner. When we first contracted, the Partition was to run clear through as in the plan in the book, I had not decided exactly whether I would have it through all the way or not, and if I did not have it through, I was to have a credit for that Partition. The Stair way in the front part of the House was included in the Contract the Stairway from the Kitchen up in the back part of the House; Also a Stairway down into the Cellar, under that stair way was included in the Contract. The deviations were that not putting up the Veranda & putting square window frames instead of oval ones, nor did he hang the windows on rollers, nor he did not put in the quality of Lumber he contracted for; nor did he do the character of work he promised to do. There were to be two Fire places & there was only one there was a deviation in the front door. The Door in the Contract was to have side lights & moulding as represented in plan "Exhibit" J.W.S." but the Door is a plain Door,

28th Int. You say you were to have Credit for that portion of the Partition in the passage
