boarding?
Ans: Yes Sir.
77th C. Int: What grade was this as known to the trade?
Ans: No. 3.
78th C. Int: What was the price of No. 3. German fluted siding at Mechanicstown in 1871?
Ans: That I wouldn't say - I didn't buy any at that time, there.
79th C. Int: When did you buy any at that time and what did you pay for it?
Ans: I can't answer that I don't know whether I bought any anywhere at that time.
80th C. Int: Was the weatherboarding painted when you saw it?
Ans: Yes Sir.
81st C. Int: If it was painted how could you tell the precise grade of material which was used?
Ans: The knots all showed through the painting.
82d C. Int: Is there any moulding upon the brackets spoken of? If yes, what do you consider the moulding on each bracket worth?
Ans: Yes Sir. Some. The moulding on each bracket is worth fifteen cents.
83d C. Int: Do you embrace in the 15 cts. the moulding also around and about each bracket?
Ans: Yes Sir.
84th C. Int: What is the bracket worth independent of the moulding?
Ans: Twenty five cents.
85th C. Int: Then you have not allowed at all for the moulding in your estimate have you?
Ans: No Sir.
86th C. Int: You have in your estimate 360 feet of boards in cornice. How did you arrive at the 360 feet?
Ans: I measured the length, width and depth.
87th C. Int: What was the width and depth?
Ans: I think it measured about three feet, taking the moulding in gross.
88th C. Int: Is there a moulding upon the cornice? And, if yes, what is it worth per foot at present prices, and what was it worth in 1871?
Ans: There is no moulding on the cornice.
89th C. Int: How long is the cornice?
Ans: Thirty six feet.
90th C. Int: From whom did you buy glass 15 x 30 for $5.75 per box in 1871?
Ans: I don't know that I bought them in 1871. Two years ago I bought them in Emmitsburg, at $5.75.
91st C. Int: From what did you fix the price at $5.75 in 1871?
Ans: I didn't allow for any difference.
92d C. Int: Can you buy that size of glass by the foot, or by the half box, in country towns, such as Mechanicstown?
Ans: No Sir.
93d C. Int: How did you arrive at the 6000 shingles you speak of? State your method of calculation?
Ans: By calculation. I counted the courses first and there were thirty
