123d. Q. Int: What do the rafters heel on in this building, if there is no raising plate?
Ans: I didn't see the heel. I would have to tear the roof off to see that.
124th. Q. Int: Then there was something on which the rafters heeled, or set on, for which you have not allowed. Is this so?
Ans: Yes Sir.
125th. Q. Int: Upon what sources of information do you base your estimate for painting the house?
Ans: From the prices I have been in the habit of giving for that kind of painting.
126th. Q. Int: You are not a practical painter yourself, are you?
Ans: No Sir.
127th. Q. Int: Did you estimate the painting in a lump, or go over it in detail and what figure do you put it at?
Ans: I estimate it in a lump and at $125.
128th. Q. Int: In making your estimate "3000 brick" did you simply guess at the number you supposed to be in the Chimneys, or did you make a neat calculation, to get that figure?
Ans: I guessed at it.
129th. Q. Int: Might there not be 500, or 1,000 more brick in them, than you allowed?
Ans: There might be, but I don't think there was.
130th. Q. Int: What was the price of brick in Mechanicstown in 1871, delivered at the house?
Ans: I don't know. They were 8$ delivered at Emmittsburg. I don't know what they were at Mechanicstown.
131st. Q. Int: In your estimate of 8$, have you made the estimate for brick delivered at the house?
Ans: For brick delivered at the house.
132d. Q. Int: Do you consider the estimate of $12.00 for building the Chimneys a fair reasonable estimate?
Ans: Yes sir,
133d. Q. Int: In your estimate of $180 for Carpenter's work did you lump the whole thing, or did you make an itemized estimate and by adding it up get that sum?
Ans: I made an itemized estimate.
134th. Q. Int: Have you that itemized estimate with you?
Ans: No sir. I have not.
135th. Q. Int: What has become of it?
Ans: I left it lay at home. I don't know.
136th. Q. Int: Can you give the items and the prices you allowed for the separate pieces of work?
Ans: Framing of the house $60. Weatherboarding I put at 40¢ per hundred $10.40. Cornice at 10¢ per foot $14.40. Flooring at 50¢ per hundred $12.70. Furnishing up windows @ $1.50 each, $27.00. There was no blinds on the windows and may be I allowed only 90¢. 13 doors would be $19.50. Ten batten doors @ 1$ would be 10$ - 350 ft. of washboarding at 3¢ per foot $10.50 = 6000 shingles @ 40¢ on the roof including laths, @ 4$
