Ans: Hemlock and White Pine as well as I remember.
13th Q. Int: How many feet of hemlock were used?
Ans: I am unable to say. There were quantities of material that were concealed, but whether it was hemlock, or pine, or something else, or whether they were whole, or spliced, I cannot tell.
14th Q. Int: In and about how many feet of hemlock were used?
Ans: I can't tell.
15th Q. Int: Can you give me, within 5,000 feet, the number of feet of hemlock used?
Ans: I cannot.
16th Q. Int: Can you give me, within 10,000 feet, the number of feet used?
Ans: No sir, I cannot.
17th Q. Int: Can you give me, within 5,000 feet, the number of feet of pine used?
Ans: I cannot.
18th Q. Int: Did you make an estimate, or measurement, of the various kinds of lumber and material used?
Ans: Well, it was partial. It was entirely impracticable to do it without tearing the building apart. I did not know, but what I might be called upon to swear to the estimate and would not have been able to do it, because I could not apply the line touching the accuracy of the number of feet. (Witness here desired to explain) In explanation of the answer that I have previously given - At the time I made the examination, I had in my hand an estimate made by Mr. Taylor, (a witness in this case) and also one made by Mr. Marsh, Complainant in this case. The estimate of Mr. Taylor I find, in many instances correct. In some instances he slightly exceeded, and in some instances he fell short, not allowing a sufficient per centage for waste. I found Mr. Marsh's bill of prices for lumber was in and about the prices of lumber in Frederick at the time.
19th Q. Int: Was there any yellow pine used in the building, and if so, what was made of yellow pine?
Ans: I think the flooring was made of yellow pine.
20th Q. Int: Look at the paper shown you marked "B.R.F." Was that the estimate of Mr. Marsh you speak of as having had in your hand, when you made the estimate?
Ans: As I before stated, it is so.
21st Q. Int: When you made the estimate you speak of, did you test the accuracy of Mr. Marsh's estimate as to measurement?
Ans: My mind is not perfectly clear, but I think my measurement fell short of Mr. Marsh's.
22nd Q. Int: Can you tell whether the difference was much, or little?
Ans: My impression is that it was slight.
23rd Q. Int: Did you examine the quality of the shingles upon the roof?
Ans: I was not up to the roof. I couldn't tell the character of the shingles without going up.
