

person out here. I don't recall his name, but they all seemed to think \$1500 was a good offer.

Q Does the bank as trustee ~~like~~^{recommend} to the Court the sale of the farm for \$1500?

A Yes, sir. I might add that the type of tenant Mrs. Renn has been able to get so far probably reaped more benefit from the renting of the property than she did, because he would have a bunch of cattle that he would pasture and of course he received naturally the income from those cattle, whereas she received nothing. At the same time it is hard to get and almost impossible to get a good tenant to go there.

Q Mr. Shuff, what have you to say as to the income from this trust as to being sufficient or more than sufficient to take care of the reasonable wants of Mrs. Renn?

A Well it isn't sufficient. If she has this farm - she also has a farm at Jefferson on which she receives hardly no income and on which she had a fire the other day. The house burnt down. We are negotiating with the insurance company now.

Q Well but I mean about the whole trust.

A Well right now I can't say how much she gets out of the two farms - they are good farms - but the only other income she receives is the income off 79 shares Potomac Edison 7% preferred stock, and I think there is also a \$500 Government Bond, and I would suppose offhand that the income from the Potomac Edison would only be five or six hundred dollars.
