COLDS

An up-to-date remedy for colds. That is what Peruna is. In successful use over 50 years.

Colds are caught in many ways: Illy ventilated rooms; rooms that have direct draughts; crowded rooms; damp houses; stuffy school rooms; offices illy heated.

A dose of Peruna at the right time, at the first symptom of cold, before the bones begin to ache, before the sore throat manifests itself, or the cough, or the discharge from the nose, just a dose or two of Peruna before these symptoms begin is generally sufficient. But after the cold is once established with the above symptoms prominent, a battle of Peruna, or maybe two, will be necessary.

MATTINGS

Strengthening the Eyebrows

The following ointment will stimulate the growth and improve the appearance of the eyebrows. Red vaseline two ounces, tincture of cantharides one-eighth of an ounce, oil of lavender fifteen drops and oil of rosemary fifteen drops. Mix thoroughly. Apply to the eyebrows with a small brush once a day. Be careful that none gets into the eyes, as it will inflame them as the oils do.

The Sleep That Counts

When you go to bed—if you are looking for beauty sleep—you should fall asleep right away. The beauty sleeper, the one who wakes up looking refreshed, will fall asleep the minute her head touches the pillow. She will fall into a slumber heavy and dreamless and she will waken in the morning of her own accord.

Milady's Mirror

Cultivating Plump Hands

The appearance of the hands is an index to the general health, and a physician looks them over when he examines the pulse.

One of the best ways of retaining or acquiring fresh, plump looking hands is by means of oil baths.

Almond oil or, lacking this olive oil is the best. This is warmed and applied after the hands have been thoroughly washed or scrubbed, rinsed in clear water and all the moisture removed.

A little cologne may be added to make the work somewhat more agreeable. Go over the hands and wrists and crevices around the nails covering the entire surface. Take five minutes or longer for each hand. The more the pores absorb the more they take in this nourishing food. This treatment continued every night or every other night for two weeks will certainly make a vast improvement in the hands.

[illegible]

Economy in Furs

A note in fur fashions which is sure to bring joy to the heart of the woman who has only a small dress allowance is that while a good deal of fur is used as a trimming, no large pieces are in vogue. For instance, from a last year's muff it will be quite possible this season to make a muff and a "choker," the name given to the small round piece of fur which encircles the throat, ties tightly in a smart ribbon bow or ends in a big velvet flower. Muffs are smaller—in fact, many are so small that they hardly cover the hands. A small, round muff and a tiny "choker" are considered the acme of smartness.

HOW 10-YEAR-OLD LASSIE MADE MONEY

CANNING CLUB MEMBER

On One-Tenth of an Acre of Land This Little Country Girl Cleared $37.50 From Canned Tomatoes. The Story of Her Work as Written by Miss Fields.

Every Queen Annes county girl should be interested in the work of the Girls Canning Clubs during the last year. By special request the Superintendent of the State Canning Club Department has forwarded to THE OBSERVER a sketch written by Miss Mary R. Fields of near Templeville who won first prize in the county exhibit. This sketch was written by the little girl and tells how she produced her pack this year and how she cleared $37.50 from one-tenth of a acre of land. The sketch is easily the best and most interesting of the lot. It follows:

I am a little girl ten years old and I joined the Girls Canning Club because I thought I could learn some of the things that Miss Eunice, our State agent, and the other girls had done. Mrs. [illegible] gave us a good talk and showed us how to can tomatoes. We girls had a meeting at each other's houses and talked about our work. We had our own officers and I was secretary. We had a good time and we girls became very good friends.

I had a little patch of land that was very poor and I had to fertilize it. I had a load of manure hauled on it and then I had it plowed very deep. I then had it harrowed and marked off in rows three feet apart. I then had a man to run a furrow with a plow in each row and I put a shovelful of fertilizer in each furrow and then I had a man to run a plow through each furrow to cover the fertilizer
