EASTON, MD.

SATURDAY MORNING, MAY 29, 1858.

BUSINESS NOTICES.

☞ Communications, the effect of which is to promote private interest, are charged for at the rate of 50 cents per square.

☞ Obituary Notices exceeding six lines in length, are also subject to a similar charge.

☞ For terms of subscription and advertising, see first page.

☞ Accounts of over six months standing are chargeable with the usual interest.

☞ Books received by mail will be promptly noticed under the editorial head.

THREATENED PROSCRIPTION.—On the first Monday in next month the election for Mayor, &c., takes place in Washington city. *A communication in the Evening Bulletin*, a new democratic paper just started in Washington, is specially addressed to the laborers in the Navy Yard, in which they are admonished that, in the event of their voting against the democratic nominees, they will be forthwith discharged from their several employments, and forced to seek a maintenance for themselves and families in other directions.

Is this not enough to open the eyes of every laboring and impartial man? A party which have ever made it one of their greatest hobbies upon which to ride down and to chase out the American party, and because they are in the majority to boldly come out and say, if not in language, in meaning, *you poor laborers you must vote our ticket, be it your choice or not!* If you do it, all well and good, if not we turn you out to seek employment wherever you can. Is that true Republican, American spirit? Is that the spirit that warmed the bosoms of the patriots of old? And further, can such doctrine as put forth by the *Bulletin* be considered otherwise than tyrannical and oppressive? Whether it speaks the feelings of the head of the Admin stration we know not; but the *Bulletin* stands as a thoroughgoing democratic paper, from the seat of Government. Now we would ask every calm reflecting mind, is the offence of such a character as to "compel these laborers to sever the ties that bind them to their hearth-stones, and to seek employment as strangers in strange places?"

MARYLAND AGRICULTURAL COLLEGE—*Report of the Register.*—Dr. John O. Wharton, the Register of the Maryland Agricultural College, has just made an interesting report to the Board of Trustees. It opens with a reference to the conditions upon which the charter for the college were granted by the Legislature—refers to the munificent donation of Dr. Wm. Newton Mercer, a native of Maryland, but now a resident of Louisiana, announces that on the 1st of September last, Robert Bowie, Esq, the society's agent to canvass the State and obtain subscriptions, reported that the amount subscribed had so nearly approximated the sum of $50,000, which the charter required, that the deficiency was made up by the board. It then goes on to speak of the site selected for the college—It is two and a half miles north of Bladensburg, nine miles from Washington, and twenty-eight from Baltimore, and can be reached from the latter city in one hour and a half by the cars. The college farm embraces 428 acres, for which $50 per acre was paid. The buildings on the farm, when purchased were a two-story brick house, forty feet square, with wings, and a kitchen running back, and a large barn, having brick basement.

CAN the Easton Star point out a single case where the American party have kept in office "*dishonest scoundrels*" after they have shown their colors? In its reply to an article in the Baltimore Clipper, it says, "the difference between the Democratic and Know Nothing parties is, that the latter retains in office its dishonest scoundrels after they are known while the former throw them overboard." It the *nice*, and *fair* editor of the Star hears of any cases where "Know Nothing" *scoundrels* hold office, and at the same time are known to be such, why does he not expose them? If he does not he is doing his readers great injustice. The assertion is made without sufficient grounds, and had he any such cases under his eye he would very willingly have exposed them. Can the editor of the Star point out enough of such frauds perpetrated by the American party, since its organization, to amount to the frauds of doorkeeper Hackney.

UNIVERSITY OF NEW YORK.—We have received a copy of the announcement of of Lectures for 1858–9, of this Institution, with a catalogue of graduates from 1842 up to 1858. Among them we find during that time sixteen from Maryland.

THE GRAIN LAW.—The farmers of Queen Ann's and Dorchester counties have held county conventions to take into consideration and to have a free interchange of opinion have resolved to give the new grain inspection law a fair trial.

CONSTITUTIONAL CONVENTION.—We have received the returns from Baltimore city and some of the counties, and the Convention is undoubtedly defeated. There was a very small vote throughout the State.—Baltimore fell off from the Governor's election over sixteen thousand votes, and the majority from that city is but 1552. Only 9116 votes cast. Gov. Hicks received 9,686 majority—26062 votes cast. So far as we have heard the vote in the counties have been as follows.

TALBOT COUNTY.	Districts. Easton,	St. Michaels,	Trappe,	Chapel,	Bay Hundred,	Total,
Ag'st a Convention,	211	99	232	187	78	807
For a Convention,	14	53	11	1	8	87

WASHINGTON COUNTY gives 1000 majority against a Convention, and Frederick county probably gives about 800.

CUMBERLAND.—The vote in this city stands 217 majority against a Convention.

HAGERSTOWN.—A reported majority of 181 against a Convention.

FREDERICK CITY gave a majority against a Convention of 240.

PORT DEPOSIT, *we learn, has given a majority of 17, for a Convention.*

A BUZZARD ORNAMENTED.—A gentleman who lives in the Trappe District informed us that whilst on his way home from Easton, on Tuesday week, in the neighborhood of the Island Creek Neck School house, he heard the jingling of a bell above his head. On looking up he discovered a buzzard sailing about with a piece of red flannel or ribbon tied to one of his legs, and, judging from its sound, a sleigh bell around his neck. Our informant is a little curious to know more of the particulars of this bell and ribbon, and should this reach the sight of the one that gave the buzzard "music wherever he goes" he will confer a favor on a number if he will favor us with full particulars in regard to it.

J. KEMP BARTLETT, formerly of this county, but for some time past residing in Kansas, has gone into partnership with the publisher of the Leavenworth Times. The Times speaks of Mr. Bartlett as follows:—

"With mental culture he combines a courteous nature and an energy and business tact that eminently fit him for association with the press.

No young man in Kansas is more highly esteemed than Mr. Bartlett and we are assured that his connection with the Times, as a partner, will add to its interest, and, prove, in an eminent degree, beneficial to the office.

KILLED.—Was committed to Easton jail on Thursday last, a negro man belonging to *Dr. G. W. Wilson of Oxford Neck* in this county, for stabbing another negro belonging to Wm. B. Willis, Esq., of the same vicinity. He inflicted several wounds on his breast, arm and head. It is said he did not live five minutes after he was stabbed in the breast. The murderer is, we understand, about sixty years old. Jealousy is said to be at the foundation of the whole affair.

SOME of our Democratic exchanges appear to be inclined to censure Gov. Hicks for appointing delegates to represent Maryland in the late Southern Convention, because it has been customary so to do—Gov. Hicks, we suppose, thinks as some of the most ultra Southern journals think—that these Conventions can result in no benefit to the South—but to the contrary—add fuel to the flame of sectionality which now exists throughout the land. The Norfolk Argus, a very warm Southern Democratic paper says:

"The Southern Commercial Convention, after doing nothing but injuring the moral force of the South, has adjourned to meet at Vicksburg the 2d of May, 1858. We want no more Conventions in the South until a crisis shall arrive, when we shall meet to act. Let us leave these Conventions to deluded women and crazy men. Some wit compared our Southern Conventions to a gas factory, with all of the odorous smell and none of the *light*. He wasn't far from right."

The Baltimore Patriot, which has always been well known for its conservativeness, also remarks:

The people of the South have strongly intimated that they want no more Southern Commercial Conventions, to discuss the stability or instability of our Union, nor the propriety of re-opening the African slave trade. One of these is solely a national question, the other belongs to the world.

We should have no objection to see a Union Commercial Convention, with representatives from all the States, acting in harmony for the mutual benefit of trade, commerce, agriculture, manufacture, &c. Such an assemblage might do much good. It would serve to interchange and disseminate broad liberal views, and being free from sectionalism or partiality, could secure and maintain universal confidence.

THE RUST.—The Norfolk Argus regrets to learn that the rust has made its appearance on the wheat in Gloucester, Mathews Princess Anne, Norfolk, and other counties in Virginia, and that serious fears are entertained that the fields in the great wheat growing sections of the State will be very greatly injured, if not ruined—causing an immense loss.

WEAVER ACQUITTED.—Young Weaver, of Baltimore, indicted at the New Castle Court, for killing Roche, at Delaware College, has been acquitted. The jury came down, after a deliberation of about three hours, at 2½ o'clock, Thursday morning.—The spectators loudly applauded the verdict by stamping, clapping of hands and hurraing.

JOHN BULL AND A YANKEE CAPTAIN.—The following are further particulars of the boarding of the Clarendon by the British steamer Buzzard:

The steamer ran in as near as was deemed prudent, and then fired several guns, (blank shots,) which Captain Bartlett understood, of course, to be a request for him to show his colors. He paid no attention, however, to the demand. In a short time he saw two boats lowered away and manned each by fifty men, with any quantity of small arms, when he (Captain B.) took his ensign and laid it on the cabin table.—Soon after the boats arrived alongside, and the commander of the steamer in person came on board, when Capt. B. received him politely, but protested against the proceedings, and would not allow any of the men to come on board, threatening to shoot the first that attempted it. Capt. B. and the British commander then proceeded to the cabin, when he (the commander of the steamer,) commanded him to hoist his ensign. He replied, "There it lies upon the table, and if your commission is worth enough, hoist it yourself

The British officer, pistol in hand, commenced pacing the cabin, saying that he would seize the vessel and take her to the port of New York, to which Capt. B. replied that was exactly what he wanted him to do; when, whether by intent or accident, Capt. B. was struck on the breast by the hand which held the pistol. Capt. B. then presented his pistol and said: "Sir, keep your hands off me, or I will shoot you." The officer replied: "I did not lay my hands on you," when Captain B rejoined—"You did, sir." The officer inquired if the sugar on board belonged to Capt. B., when he replied: "I never owned a hogshead of sugar in my life." The same question was asked in regard to he launches, (boats for conveying the sugar from the shore on board,) and the same reply given. The officer, completely cowed, proceeded on deck, and, after reaching the deck, in a perfect rage bellowed forth—"Lower away the gangway ladder," when Capt. B. quietly said—"Sir, did you order that ladder to be lowered, or did you request it to be lowered?" when the officer said: "Will you please have it lowered?" Capt. B. then gave orders for it to be done, and the Britisher departed without having accomplished his purpose.

Capt. Nichols, whose vessel was also boarded and searched, is of opinion that the British officer was intoxicated at the time.

QUANTITIES OF RAIN.—Amongst many persons an opinion prevails that about an equal quantity of rain falls each year, but from the meteorological register at the hospital at Fort McHenry, an extract from which has been furnished by Major French, it will be seen that the quantities vary very materially. The following is the extract, showing the number of inches of rain from January 1st up to Monday, at 1 o'clock P. M., with the table for the corresponding period of last year:

1858.	Inches.	1857.	Inches
January,	3.58	January,	6.66
February,	3.47	February,	1.80
March,	2.57	March,	4.50
April,	8.47	April,	3.85
May,	7.49	May,	2.30
Total:	25.97	Total;	19.11

These tables show a difference in 1858, on the corresponding period of 1857, of 6.86–100 inches. In April and the same portion of May, 1857, there fell 6.15–100 and in the same period of the present year, 16.41–100 inches. This extract shows that an unusual quantity of rain has already fallen, and the information cannot fail to prove interesting to those curious in such matters.—*Balt. Sun.*

SHOCKING MURDER BY BOYS IN ST. LOUIS.—Three boys, employed in a barber shop at St. Louis, have been arrested for the murder of Hugh Downie. One of the boys named Theodore Debold, aged 17, has confessed that Downie went into the barber shop and was shaved. He had visited the shop on two other occasions, and had conversed about mules, horses, &c., so as to give an idea that he was a man of considerable wealth. Upon the evening in question, (Sunday week,) after shaving, he invited Nicholas and Antonie, the two other boys, to go out and take a drink: when they came back, Antonie persuadd him to be shampooned, and Downie took a chair for that purpose: Antonie then drenched his hair in the fluid used for cleaning the head, and purposely let some drops fall into his eyes, thereby blinding him effectually.—While this was going on Nicholas took a halter which had previously been prepared for the purpose, put the noose around the neck of the victim, and drew it so tight that the very life was choked out of him in a few seconds. They then threw the body in the cellar, after robbing it of $50, a silver watch, silk guard and gold shirt buttons.

THE SPOILS OF WAR.—The English troops had a rare time of it in Lucknow. It was impossible, the officers say, to stop the plunder, and from the accounts given they did seem disposed to attempt impossibilities.—The place was given up to pillage. All the evidence of barbaric magnificence, furniture, embroidered hangings, chandeliers, statues, mirrors and china, were knocked about in search of treasures. Those who could not get in at once to carry on the work searched the corridors, battered off the noses legs and arms of the statues in the gardens, or, diving into cellars, either made their fortunes by the discovery of unsuspected treasure, or lost their lives at the hands of concealed fanatics. The amount of spoils carried off by the soldiers is said to have been very large.

THE LOST DAUGHTER FOUND.—The Bucyrus Journal says that a man living near there, lost his wife some years ago in Homer, New York, that they had a little girl which he gave to a friend and left the country. He was gone ten years, and returned, but could find no trace of his child. She had two marks by which he might know her, one toe was gone and she had a scar on her arm. The man gave her up as lost to him, and finally settled near Bucyrus and married, but strange to say, discovered her a few days ago in his own family, she having lived with him two years in the capacity of a servant. Had he not accidentally seen her foot, he would still be ignorant as to her identity.

ANOTHER GREAT FLOOD IN THE WESTERN RIVERS.—Dispatches from St. Louis announce another rise in that quarter, and the Illinois again at flood height—even higher than ever—and over its banks in every direction. The Pittsburg Chronicle, of Tuesday, says:

The Wabash river is higher than ever was known, and spreading all over the country in the vicinity of Vincennes, where the river was ten miles wide. This is a world of waters, indeed, which, when added to the flood in the Mississippi, will be very apt to deluge the lower country in earnest White, now, is equally as high, and over its banks in all directions, and the Ohio and Mississippi railroad is much damaged and obstructed, as well as the Illinois road, thus interrupting travel to Cairo.

For miles the water is on a level with the track of the E. & C. railroad. The grain crops of the best farmers in the country are ruined, past redemption. We learn that the river at Terre Haute has overflowed the whole country, and has risen four feet since the rains of Friday evening, and was still coming up at the rate of an inch per hour. Three bents of the tall bridge had given way, and hundreds of the citizens had assembled on the banks, momentarily expecting to witness the destruction of the whole superstructure. The foundation of one of the piers of the T. H. and Alton railroad bridge was washed away, and the trestle-work, about three-quarters of a mile west of the river, was also giving way; the danger had become so imminent that the trains had been forbidden to pass.

A NEW ATLANTIC TELEGRAPH.—We find the following in the London Times of May 5:—

Proposals are to be issued for the laying down of a second electric cable to America by an association to be called the European and American Submarine Telegraph Company, with a capital £1,000,000, in £20 shares. Plymouth is to be the point of departure from the English coast, whence it is to proceed, via Cape Finisterre, Lisbon, and the Azors to Boston in the United States or to the Island of Bermuda, and thence to Cape Hatteras, in North Carolina. The total length would thus be nearly 4,000 nautical miles. The promoters state they have received certain concessions with exclusive privileges from France, Spain and Portugal. It is also suggested that an advantage of the route would consist in the fact that the line could be continued from Lisbon to Gibraltar, so as to connect with the Indian communication by way of the Mediterranean. No directors' names have yet been put forward.

FREAKS OF THE LIGHTNING.—On Friday last, a terrific thunder storm visited the premises of Mr. Henry Carter, in Worthington, O. The fluid played some queer freaks about the dwelling house. The family were taking supper, when the lightning struck a Locust tree, standing twelve feet from the house, which it shivered badly.—It then struck the barn, tearing away the Northeast corner post, and carried it with the boards attached, some five or six rods, into an adjoining field. It struck and shook the house so that it broke in one window, containing fifteen lights; it broke all the lights but three, and out of another window it broke four lights. As the family were sitting around the supper table, it struck the crockery, throwing a tumbler into the air, rolling the teacups about in different directions, and, strange to say, without hurting any of the inmates, although there were eight persons sitting there.

THE STEAM FIRE-ENGINE "ALPHA."—The house of the First Baltimore Company, says the Sun, continues to be the mecca of numerous persons, particularly firemen who appear never to grow weary of inspecting the naval steam fire apparatus "Alpha" of the above company, which on the occasion of the public trial, proved itself such a perfect extinguisher. An estimate of the cost of such an apparatus has been made by the officers of the First Baltimore Company, who have set it down at $2,200 per annum: The estimate embraces a balance of $600 per annum for engineer, $300 for assistants to engineer, $400 for two horses and $500 for repairs. The latter item will not be large in this instance, as the company have determined not to move their engine from the house unless there be positive evidence of a conflagration.

BITTEN BY A SNAKE.—Mr. Levi Brubaker, of Warwick township, Pa., and his son a lad of about twelve years of age were walking through a wheat field, the boy, being some distance behind his father, on a sudden screamed with terror. His father hastening back, found that a monstrous black snake had coiled around the boy's foot and leg—the boy being without shoes—bit him in a dreadful manner. After taking the lad home, he made an application of saleratus dissolved in whiskey, which effectually removed the poison. The teeth of the snake are marked large and deep above and below on his foot.

WHAT THE LEVIATHAN IS GOOD FOR.—In case the attempt to employ the Leviathan in commerce should result disastrously, it is suggested that she would make a good monument. Standing on end, the monster vessel would rise to more than three times the height of Bunker Hill monument, higher than the projected Washington monument higher than any monument in the world, higher than the Pyramids. If nobody dies and nothing occurs, worthy to be comemorated by such a monument, then she might be used for the first section of a tubular bridge over the Mississippi.

MR. EVERETT'S SOUTHERN TOUR.—Mr. Everett has returned from his Southern tour. Since the month of November he has repeated his discourse on "The Character of Washington," for the benefit of the Mount Vernon Fund, twenty-three times, with an aggregate net receipt of $11,615; and his address on "Charity," fourteen times, for the benefit of various charitable institutions, with aggregate net receipt of $12,433. The net proceeds of his oratorical labors for the last six months, for the benefit of the Mount Vernon fund and various charitable institutions, is $27,078.

"Mr. Clay was the author of a great many glorious things, and of only one that he had any reason to be ashamed of—and that one is now in Congress."—*Prentice.*

An important step has been taken by the firms engaged in bank note engraving and printing. They have all united and formed a company, which is to be managed by trustees, and conducted upon a basis calculated, as they say, to "afford to banking institutions the aggregate advantages, responsibilities and safeguards posessed by all the houses comprising the corporation." They embrace all the firms in the United States which have been connected with bank note engraving.

WHY A MAN MAY MARRY A DECEASED WIFE'S SISTER.—One argument in the British Parliament in favor of letting men marry their deceased wive's sisters was that by doing so a man had only one mother-in-law instead of two.

Prices Current.

BALTIMORE, May 26, 1858

may 29-3m WM. HARKER.

County Commissioner's Sale.

NOTICE is hereby given, that the contract for making the piece of new public road in Trappe District, recently laid down by Thomas H Leonard, Thomas E Lloyd, and Charles R Mullikin, Esqs. Examiners, appointed for that purpose and surveyed by James M Leonard, surveyor, and running from the extreme end of the county road, in Island Creek Neck, from a point marked letter B on the plat, with the division line between John W Martin and N Martin, Jr, Esq, to the corner marked figure 3 on the plat, and thence through the lands of Capt John W Martin to the land of Wm M Chamberlaine, Esq, thence with the division line between the said John W Martin and Wm M Chamberlaine, to a small turn in the road, thence through the Lands of Capt Jno W Martin, to the water at Clora's Point, will be sold to the *lowest bidder*, in front of the Court House, in Easton, on

Tuesday, the 15th day of June next,
at 2 o'clock P M of said day.

The said road is about one mile and three quarters long, more or less, and thirty feet wide, and running mostly through heavily timbered woods. The contractor will be required to make the road agreeably to the aforesaid survey, to ditch and bridge the same wherever necessary—the bridges to be made of white oak plank, not less than two inches thick—and to clear it of all stumps and other obstructions to travelling and to complete the same within six months from the day of sale, in a manner to be approved by examiners, to be appointed by the county Commissioners for that purpose The terms of payment to be agreed upon between the purchaser and the commissioners. A portion of the purchase money will be reserved by the county until the work is completed, and the road received by the commissioners. Near the waters of Clora's Point, a stream crosses the road, over which it will be necessary to construct a frame bridge, of at least fourteen feet span—the said bridge to be of white oak material Between the aforesaid bridge and the branch is a marsh through which the contractor will be required to make a good and substantial road, by filling in with brush, and covering the same with sand or dirt from the beach. By order of the Board,

T. K. ROBSON, Clerk.
