The Easton Gazette,

Saturday Morning, April 1

LOCALS.

A Most Shocking Accident—Yesterday morning just before 9 o'clock our citizens were thrown into a deep state of feeling, caused by a distressing accident at the High School. About a year ago the students of this school were furnished small muskets by the State for the purpose of organizing the higher department into a military school. Last fall the boys were permitted to take them to their homes, but a short time ago Prof. Miller, the Principal of the Academy, colled them in and yesterday morning one of the boys, Richard Hardcastle, returned his, loaded with shot. The school room had not been opened for the morning and a number had congregated in front of the building, as boys will do, when one of the students, about 19 or 20 years of age, named Oliver P. Stevens, took up the gun that young Hardcastle had taken there, put a cap on it and commenced to point it at various boys, when at last the cap exploded and the load took effect in the leg of little Josie Dodson, aged 10 or 12 years and son of L. Dodson, Esq., one of our most esteemed citizens. The calf of the left leg was shot away and the bones below the knee were completely crushed.—Prof. Miller learning of the accident, made the little fellow as comfortable as possible until his father and physicians arrived. He was then borne to his own home, where life gently ebbed out about 1½ o'clock P. M.

Drs. Anderson, Chamberlaine, Earle and Bateman were in attendance and rendered all possible aid.

The funeral of the deceased will take place at the M. E. Church to-morrow (Sunday,) at 2½ o'clock P. M.

Baltimore A. M. E. Conference.—This body will hold its session this year in the Bethel Church at Easton, commencing on Wednesday, April 26th. Bishop Wayman will preside. All the State of Maryland the District of Columbia are embraced in this Conference, and there are about sixty members. According to the arrangements made the ministers going to Conference from the western part of the State will take the steam boat from Light street wharf for Easton, via Miles River Ferry. Rev. John F. Lane, of Georgetown, D. C., will preach the annual sermon, and Rev. James H. A. Johnson, of Hagerstown, the missionary sermon.

"The Bachelor."—We have received a copy of the "Bachelor," published and edited by a full corps of Bachelors. The *Bachelor* presents a very neat appearance—seven columns to the page—and take it altogether, we think a remarkable issue from such parentage.?

☞ The Medical and Chirugical Faculty of Maryland will meet in annual convention, at its Hall in Baltimore, on Tuesday, April 4th, at 12 M. All regular Medical Societies in the State are entitled to representation: A full meeting is urged by the faculty.

Enlarged.—We see that friend Emerson of the American *Union*, has enlarged his paper—which will give him much more space. The *Union* is one of the neatest and best conducted papers on the shore. We wish him prosperity.

☞ In consequence of the indisposition of Dr. Ewell, the new pastor of the Methodist Protestant Church, he has been unable to move, consequently there will be no service in that Chuch in Easton, (to-morrow,) Sunday.

☞ C. Willey, on Willey's Island, left his meat house unlocked a few nights ago and some one borrowed several pieces of meet therefrom. At last accounts they had not been returned.

[COMMUNICATED.]

To the Commissioners of Talbot County:

I respectfully call the attention of your Honorable Body to a memorial presented by me about a year since, praying to have my outward appearance improved by a coat of substantial and much needed paint. I have waited patiently for a favorable response to my petition, but in vain. I had almost lost hope, when I observed a friend of mine (the same one who goes out into the little balcony and calls out "Oyez," when the Cout meets) busily engaged in getting signatures to a paper he carried in his hand, and from the number of persons who signed I judged he had been very successful. My curiosity being excited, I tried to discover the object of the petition. Late in the afternoon my friend came over to where I was standing and meeting an acquaintance, read aloud to him the petition and the names attached. Judge of my surprise and pleasure when I found that it was a petition for a new fence to be placed around the Court House square, and a coat of paint for myself, signed by nearly all the tax-payers and representing all classes and conditions. My good friend had been indefatigable in his efforts in this matter and I shall ever remember him with gratitude. Now, gentlemen, may I ask, do you not feel yourselves authorized to go forward and make this much needed improvement?—The square and public buildings are under the control of the County authorities and they should be made to present an appearance creditable to the county. In all matters of this kind the initiative step has to be taken by some body; let the responsibility therefore be taken at once; as in all public enterprizes, opposition ceases when the work is accomplished.—Who regrets the building of the new market house and town hall? I understand that if a substantial iron fence is placed around the court house square, the Town Commissioners will lay a brick pavement in front of the square, which will not only be a great public convenience, but will be an ornament to this already attractive portion of our town. And now, gentlemen, let me call your attention to another subject of perhaps more importance than either of those above alluded to; I mean the subject of fire-proof vaults for the County Records. This is a matter of deep interest to every citizen of the county; its importance has been felt and canvassed for several years past, and various suggestions have been made, but, as I have stated above, *somebody* must take the initiative, and unless this is done, the matter will be left to languish until, perhaps, some morning, the people of the county will find themselves suddenly confronted with a loss of perhaps several hundred thousand dollars, in the destruction of their records, and the material for litigation and ill feeling for generations to come. Being of a practical turn of mind, I suggested the following plan for your consideration. The Clerk's office is now too small for the transaction of the public business; it must be enlarged by some means, it may be done in connection with the vaults. Close up the two side entrances to the Court house, they are of no use except to the boys and Frank Wright's goats; let the intervening spaces between the Clerk's office and the law library on the one hand, and the Register of Will's office and the School Commissioners room on the other, be fitted up as fireproof vaults, with doors communicating with the Clerk's and Register's offices respectfully. In this way the offices could be enlarged, the vaults secured and the wishes of the public gratified, by an expenditure, trifling indeed, when we consider the importance of the object sought. As I remarked, the side doors are of no use except for depredators, they in fact, help to make the building insecure. The only entrance necessary is at the front door. Let the present flight of stairs be taken away, and a wide stair case be constructed, commencing about where the door of the old town library is, and running back, dividing right and left at the proper point, and leading into the Court room by the rear or west end. This arrangement would be cheap, convenient and decidedly more in accordance with good taste than the present one. Instead of crawling around the wall on the present ricketty staircases, persons entering the front door would proceed straight forward up the steps into the Court room. I have thrown out these suggestions to your honorable body, in the hope that you may see their relevancy, and, acting for the public good, may carry them out. If any one can produce a better plan let him do so. Circumstances have of late years left me entirely open to correction, and I am ready to embrace or countenance almost any means to better my condition. I am sure I have your sympathy, let me have your action and hearty support. I am the more solicitous on this point because I am not sure you will be in office longer than the present year.—I have heard growls of dissatisfaction and mutterings of vengeance from some angry-looking persons going up and coming down from the Commissioners' room, that have filled me with apprehensions and alarm. What they can have against our present board I am at a loss to imagine. Certainly not squandering the people's money in useless improvements. And now, gentlemen, before I conclude, I will mention a matter, confidentially, which has occupied my attention and thought recently and occasioned me much uneasiness, and which is indeed partly the cause of my anxiety to have myself repaired and renovated with a view of discovering and removing the cause of the difficulty. I am sure you will bear with me and not think me unnecessarily credulous. I know that what I am about to relate will subject me to ridicule and the charge of weakness unbecoming to my years. I cannot, however, be deceived in my senses and I "state but the facts." Certain mysterious occurrences that have taken place recently have convinced me that there are "ways that are dark" in and about these premises that I never could have conceived of before.—I have conducted myself with the strictest propriety through life, disregarding entirely "tricks that are vain," and aiming to make myself respected by observing the strictest decorum. You can judge of my mortification when it was asserted that ghosts were harboring and lurking about in the lower room and also in the Court room. Some search was made.—I waited in heathless anxiety. My kind and excellent keeper, accompanied by the Clerk of the Court armed with a heavy club, repaired to the Court room, and while there I saw bits of coal, pieces of iron, &c., fall directly through the ceiling without any apparent human agency.—I was thunderstruck, the Clerk looked astonished and the keeper frightened. Not a soul was visible. The keeper examined the desks, stoves, spittoons and the water-cooler, but nothing of an animated nature could be discovered. In the room below events of the most startling character occurred. Not only were bits of coal, wood, iron, &c, being thrown mysteriously about, but a hatchet which had suddenly disappeared from the Clerks office, came falling through the ceiling and landed near the feet of my friend, the "Squire," who picked it up and exclaimed in my hearing, "that it was hot and smelled of sulphur." That these occurrences are continually taking place it is useless to deny. My friend, the keeper, in coming to close me up on the night after the occurrence alluded to, halted a short time after he entered the front door, and I observed him turn all his pockets inside out, and in that condition approached the south door and barred it, then proceeded to the north door, where a huge goat just made his appearance, and both parties being surprised each fled in opposite direction. The goat, however, having permanently disappeared, my good and kind friend, the keeper, fastened me up, straightened out his pockets and went home. My friend, the bell-ringer, on Sunday morning last, came softly up the steps, his countenance wearing that prudent but firm expression, indicating the heighest moral courage, and proceeded to examine the pillars, angles, abutments and recesses of this dark third story; not discovering anything, however, of an ultramundane character, he approached the ropes, dropped on his knees, uttered a fervent prayer with his eyes open; and then rang the bell as usual, being about 10 minutes behind time on account of his ritualism. I consider him one of my best friends, and for that reason I caution him against walking over these thin coatings of laths and plaster, in search of ghosts, for a man of his calibre will be likely to go through, in which case it would be well for him to remember his *latter* end. I am sure, gentlemen, you will not misunderstand the motives which have induced me to make these disclosures to you, still less will you treat with levity the sincere and earnest appeals which I make for relief. I indulge the hope that your well known sense of justice, and a desire to promote the public good, will induce you to adopt the plans I have offered. Hoping, by all means put them into immediate execution. Do not delay. If there be among you any who look forward to any other corner of the Court house a few years hence, *now* is the golden opportunity to have those arrangements made, which shall make such occupancy pleasant and agreeable when the time arrives. You will not understand me as trying to be facetious—Not at all. I speak with all seriousness and you will give me credit for sincerity at heart. And now, gentlemen, having laid my case before you, I will await, as patiently as I can, your action in the premises.

I am yours, with the greatest respect,
The Old Court House.

Ayere's Sarsaparilla,
For Purifying the Blood.

The reputation this excellent medicine, enjoys is derived from its cures, many of which are truly marvellous. Invete rate cases of Scrofulous disease where the system seemed saturated with corruption, have been purified and cured by it, Scrofulous affections and disorders, which were aggravated by the scrofulous contamination until they were painfully afflicting, have been radically cured in such great numbers in almost every section of the country, that the public scarcely need to be informed of its virtues or uses.

Scrofulous poison is one of the most destructive enemies of our race. Often this unseen and unfelt tenant of the organism undermines the constitution, and invites the attack of enfeebling or fatal diseases, without exciting a suspicion of its presence. Again, it seems to breed infection throughout the body, and then, on some favorable occasion, rapidly develop into one or other of its hidious forms, either on the surface or among the vitals. In the latter, tebercles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it shows its presence by corruptions on the skin, of foul ulcerations on some part of the body.—Hence the occasional use of a bottle of this *Sarsaparilla* is advisable, even when no active symptoms of disease appear.—Persons afflicted with the following complaints generally find immediate relief, and at length cure, by the use of this Sarsaparilla: St. Anthony's Fire, Rose or Erysipelas, Tetter, Salt Rheum, Scald Head, Ringworm, Sore Eyes, Sore Ears, and other eruptions or visable forms of Scrofulous disease. Also in the more concealed forms, as Dyspepsia, Dropsy, Heart diseases, Fits Epilepsy, Neuralgia, and the various Ulcerous affection of the muscular and nervous systems.

Syphils or Venereal Disease are cured by it, though a long time is required for subduing these obstinate maladies by and medicine. But long continued use of this medicnie will cure the complaint. Leucorrhoea, or Whites, Uterine Ulcerations, and Female Diseases, are commonly soon relieved and ultimately cured by its purifying and invigorating effect. Minute directions for each case are found in our Almanc, supplied gratis. Rheumatism and Gout when caused by accumulations of extraneous matters in the blood, yield quickly to it, as also Liver Complaints, Torpidity, Congestion or Inflamation of the Liver, and Jaundice, when arising as they often do, from the ranklingpoison in the blood. This Sarsaparilla is a great restorer for the strength and vigor of the system. Those who are Languid and Listless, Despondent, Sleepless, and troubled with Nervous Apprehensions or Fears, or any of the affections symptomatic of Weakness, will find immediate relief and convincing evidence of its restorative power upon trial.

Prepared by Dr. J. C. Ayer & Co., Practical and Analytical Chemists, Lowell, Mass. and sold all around the world. Price $1.00 per bottle. (Feb 25 3m

JUST received a full assortment of Candies—French and plain. Queen Olives, a very superior article. Prepared Salad Dressing, new in this market. Pickles—Chow-chow, Sardines and Jellies. Toothe Brushes, best English make. Very fine Bathing Sponge Brushes of all kinds, and Feather Dusters, For sale by
sept 17 Henry & Goldsborough.

Clear & Harmless as Water
Nattans' Crystal Discovery for the Hair.

A perfectly clear preparation, in one bottle, easily applied as water for restoring to gray Hair its natural color and youthful appearance; to eradicate and prevent dandruff, to promote the growth of the hair and to stop its falling

It is entirely harmless and perfectly free from any poisonous substenance, and will therefore, take the place of all the dirty and unpleasant preparations now in use. Numerous testimonials have been sent up from many of our most prominent citizens, some of which are subjoined; in everything in which the articles now in use are objectionable, *Crystal Discovery* is perfect; it is warranted to contain neither Sugar of Lead, Sulphur or Nitrate of Silver. Clear and clean as water, it does not soil the close or scalp; it is agreeably perfumed, and makes one of the best dressings for the hair in use, it restores the color of the hair *more perfectly and uniformly* than any other preparation, and always does so, in from three to ten days Virtually feeding the roots of the hair with all the refreshing qualities, necessary to its growth and healthy condition, it restores the decay, and induces a new growth of the hair more positively than anything else. The application of this wonderful discovery also produces a pleasant and cooling effect on the scalp, and gives the hair a pleasant and elegant appearance.

Washington, D.C., July 25th, 1870
Mr. Arthur Nattans—*Daar Sir:*—It affords me pleasure to say that I have used your Crystal Discovery with perfect success. Having tried many others, I find yours superior to any I have heretofore used and I cannot too highly recommend it as a rapid promoter of the growth of the hair, and by a few applications restoring it to its original color. It is perfectly clean and free from any objectionablo matter.
Very respectfully, yours.
R. W. SILVOY,
K street, between 4th and 5th, N. W.

☞ We call especial attention to the fact that a limited number of trial bottles will be given away gratuitously to those wishing to try. You will notice that in pursuing this course, our aim is to convince by the actually merits of the article. ARTHUR NATTANS,
Inventor and Proprietor,
Washington, D. C.
☞ To be had in Easton, at Henry & Goldsborough's Drug Store.

THE NEW
FAMILY SEWING MACHINE
291 **Empire** 291
BOWERY

THE extraordinary success of the Empire and improved manufacturing Machine light or heavy work, has induced the Empire Sewing Machine Company to manufacture a New Family Machine of the same style and construction, with additional ornamentation, making it equal in beauty and finish with other Family Machines; whereas in usefulness it far OUTSTRIPS ALL COMPETITORS.

The price of this now acknowledged necessary article comes within reach of every class, and the Company is prepared to offer the most liberal inducements to buyers, dealers and agents. Every Machine warranted. Apply for circulars and samples to
EMPIRE SEWING MACHINE CO.,
No. 294 Bowery, New York.

Coal! Coal!

THE consumers of coal will remember that the summer season is the time to buy coal the cheapest. I am now receiving at my coal yard at Easton Point the various sizes of best quality of Anthracite Coal, and am preparing to deliver the same at any place in Easton or vicinity, *very cheap*, for cash.

Persons on any of the Talbot rivers or Creeks can have their coal delivered on their premises.

Cooking coal, smithing coal, and Cumberland Lump Coal, for grates, always on hand at the lowest market rates.

The quality of the coal is the best; it is clean and in good order; and will be sold at 2240 lbs. to the ton.

Persons would do well to send in their orders while the price of coal is down.

HOMES FOR ALL!
IN THE
Land of FLOWERS & Perpetual GROWTH.

FLORIDA;
The Italy of America,

Is not excelled in Climate, by any of the United States, and it may be doubted whether it can be equalled in the world:

Located on the very borders of the Torrid Zone, still her situation between the Gulf of Mexico and the Atlantic Ocean is such that she is swept alternately by the winds of the Eastern and Western Seas, and relieved from the burning heats which prevail in other Southern States; and thus it happens that by the joint influence of lastitude and peculiar location, she is relieved, on the one hand, from the rigors of the Winter climate of the Northern and Middle States, and on the other, from the extreme heat with which not only the Southern States, but in the summer time the Northern States are characterized.

Settlers have not the hardships to undergo that have been the lot of the pioneers who opened up and developed our harsh Northern latitudes. The entire year is a perpetual season of growth, able to produce and send to market all the productions of the Tropical and Temperate Zones weeks and months in advance of any other locality, and at a season when all such productions are luxurious, and command the very highest prices.

The Florida Improvement Company, under the auspices of the State of Florida, propose to furbish lands of uniform good quality, and upon which can be raised Vegetables, Fruits, etc., common to the more Northern climates, and all the Grains, Fruits and Vegetables of the Tropics.

Such *selected* lands, in the Healthiest part of the State, and of the best quality.

The Company have issued a pamphlet of 128 pages, containing full and reliable information concerning Florida, its Climate, Soil and Productions, with a sketch of its History, which the Company will forward, free of postage, on receipt of 25 cts.

For other information or circular, address
THE FLORIDA IMPROVEMENT CO.,
34 Park Row, N. Y.

NEW YORK AND FLORIDA COLONY. Artially organized. For full information, circulars, etc., address EDWARD DELOUEST, 83 Nassau St., New York.
