steady. weak.

The New York *Herald* of yesterday says:

Stocks continue to tend steadily upward. There was some realizing in the railway shares this morning, and for a short time the market showed signs of weakness, and for some of the leading speculative stocks, such as Central, Erie, Michigan Southern, Central and Pacific Mail, reached ¾@1¾ per cent. The Western shares closed this evening at about the quotations of saturday evening. The foremost on the list were the Galena and Chicago and Burlington and Quincy. Pacific Mail was in active demand this afternoon at Saturday's price. The speculators talk of par, dividend off, for next month. State stocks were a fraction better this evening, without much activity. Governments were a fraction lower. The market closed firm.

Considerable feeling is expressed in the street in reference to the action of the Bank Committee at Washington. It is regretted that gentlemen should volunteer to represent the New York city banks, and should bring ridicule upon this community by urging propositions so utterly preposterous as those which were laid before Mr. Chase by the committee. We have always argued that the financial affairs of the country should be in the hands of persons bred in this metropolis and familiar with financial movements here. But if the propositions of the Bank Committee can be regarded as an evidence of the degree of financial skill possessed by our leading financiers, it is fervently to be hoped that none of them will be allowed to exercise any influence upon Congress.

The following is the statement of the New York banks compared with those of the previous week:

TREGO'S

CEREAL AND PLANT FOOD

AND

RUST PREVENTIVE,

TESTED AND APPROVED BY

DAVID STEWART, M. D.

CHEMIST

MARYLAND STATE AGRICULTURAL SOCIETY.

SOLD BY

P. MALCOM & CO., General Agents,

BALTIMORE.

This Compound contains all the SEVEN ELEMENTS that a Vapose CEREAL and PLANT FOOD. It hastens, by ten or twelve days, the maturity of the Plant and Grain, and specially adapted to crops requiring an early and vigorous start to bring them to perfection, for late seeding (especially upon Corn grounds) where the soil plant food has been rapidly removed by the previous crop. It SECURES THE WHEAT FROM RUST and insures a good yield of the best quality of Grain.

We submit the following results of the use of the "Plant Food."

FORT PENN, Del., Sept. 7, 1861.

Messrs. TREGO & SON, Baltimore.—The "PLANT FOOD" spread this spring both here and at the experimental farm at St. John's College, Annapolis, doubled, and I think, trebled (as the weights will prove) my product of both grain and straw. There was no doubt about that. No marks nor stakes were required at any period, the dark green color, the *standing* of the grain, giving the appearance of double the number of plants from the same number of seed; the earlier ripening or maturity of the crop where the PLANT FOOD was applied, the evenness and height of the plant and the straw, all told the same story, viz: that the PLANTS there had room, of which the soil elsewhere was deficient. No other reason could possibly be assigned, as the crop was sown and harrowed in *before* the manure was spread as a top dressing.

Yours respectfully, DAVID STEWART,
Professor of Agricultural Chemistry,
St. John's College.

NORTH EAST, Md., Sept. 5, 1861.

I applied the "PLANT FOOD" at the rate of one to two hundred lbs. per acre on Corn ground last spring, and the crop was very good, fully up to my expectations. I also applied it to Corn in the hill, putting in a very small quantity in each hill, the corn started and has kept far ahead of that on the side of it, which was manured with ashes in the hill.

From the little experience I have had with it, I think it preferable to Guano or Bones—and shall so recommend it.

Yours respectfully, RUSSELL THOMAS.

The PLANT FOOD is put up in substantial bags of 150 lbs each. m10-tf
