VALUABLE LAND IN ALLEGANY COUNTY, FOR SALE.

A TRACT OF LAND called TREASURE TROVE, containing about SIX THOUSAND ACRES, originally granted to John W Pratt, on the 31 day of March, 1801, and resurveyed for the Hon. Thomas G Pratt about the year 1846. It is situated about 15 miles east of Cumberland, on the great National Road which intersects the property. Wheat, Oats and Indian Corn grow admirably in this region. It is admirably suited to sheep raising. There are several farms opened and cleared upon the land and now under rent. The tract, however, is principally wooded with large Oak and Pine timber, which can easily be transported over a gently sloping road to the Chesapeake and Ohio Canal and the Baltimore and Ohio railroad which lies within 2 miles of the southern boundary of the tract.

In the centre of the tract are several remarkably fine Sulphur and Iron SPRINGS of different strengths, issuing from a small valley within a few yards of each other. These springs are another Sulphur Spring in the same vicinity, but far years be known and reported to first by the Indians and afterwards by the Hunters for their Hygienic qualities. A few miles off near to the mountains is a very fine IRON SPRING, which is well known in the neighborhood and is remarkably adapted to the cure of all cutaneous diseases.

The whole is offered for sale at very low rates and on long credits, as it will be divided into SMALL FARMS or sale to suit purchasers. Apply to

TREGO'S CEREAL AND PLANT FOOD AND RUST PREVENTIVE,

TESTED AND APPROVED BY DAVID STEWART, M. D., CHEMIST MARYLAND STATE AGRICULTURAL SOCIETY, SOLD BY R. MALCOM & CO., General Agents, BALTIMORE.

This Compound contains all the SEVEN ELEMENTS that compose CEREAL and PLANT FOOD. It hastens, by ten or twelve days, the maturity of the Plant and Grain, and is peculiarly adapted to crops requiring an early and vigorous start to bring them to perfection. For sale spending especially upon cold grounds where the soil plant food has been rapidly removed by the previous crop. IT SECURES THE WHEAT FROM RUST and insures a good yield of the best quality of Grain.

We submit the following results of the use of the "Plant Food":

FORT PENN, Del., Sept. 7, 1861.

Messrs. TREGO & SON, Baltimore.—The "PLANT FOOD" spread this spring both here and at the experimental farm at St. John's College, Annapolis, dodged, and I think trebled the weights will prove my product on both farms and grew. There was no doubt about that. No shaking or stakes were required at any period, the dark green color, the flooring of the grain, giving the appearance of double the number of plants from the same number of seed, the earlier ripening or maturity of the crop where the PLANT FOOD was applied, the coolness and height of the plant and the straw, all tell the same story, as the PLANTS there had root, of which the oil cake where was defective. No other reason could possibly be assigned, as the crop was sown and harrowed in before the manure was spread as a top dressing.

Yours respectfully, DAVID STEWART, Professor of Agricultural Chemistry, St. John's College.

NORTH EAST, Md., Sept. 6, 1861.

Messrs. WM TREGO & SON, Baltimore.

I applied the "PLANT FOOD" at the rate of one to two hundred lbs per acre on oats ground last spring and the crop was very good, fully up to my expectations. I also applied it to Corn in the hill, put it up in a very small quantity in each hill, the oats stinted and has kept far ahead of those on the side of it, which was manured with ashes in the hill.

From the little experience I have had with it, I think it preferable to Guano or dung—and shall so recommend it.

Yours respectfully, RUSSELL TODD.

The PLANT FOOD is put up in substantial cases of 150 lbs each.
