

room, dining room, kitchen, butler's pantry, half bath, additional pantry, and enclosed side porch on the east side of the property. Other than that I think it is as Mr. Bowlus stated. It does have an oil fired hot water heating plant.

Q Could you give us any opinion as to its condition?

A The house does need quite a little work on it. The kitchen is old-fashioned. It only has a sink and an upright kitchen cabinet.

Q What about the condition of the heating plant?

A The heating plant looks all right. The plumbing or most of it is copper - what you can see. I don't know what is in the partitions. Some is galvanized I believe.
