T= 92.00'

GENERAL NOTES

1. All storm drains shall be constructed in accordance with the General Specifications of the Washington Suburban Sanitary Commission, adopted Sept. 30, 1954.
2. Types of structures refer to the Washington Suburban Sanitary Commission's Standard Storm Drainage Details unless otherwise noted.
3. Information concerning underground utilities was obtained from available records, but the Contractor must determine the exact elevation and location of the mains by digging test pits by hand at all utility crossings well in advance of trenching.
4. Maximum length of pipes to be laid on curves to be 6'
5. Have developer set all property pipes necessary to stakeout this construction.
