Kodak AHU Microfilm 5460

Light Meter at 90 volts a.c.

Camera on 20 scale

CONTINUED

Explaination of Film from
the clerk of the circuit court
of Harford County, Bel Air, Md.

Any duplication of pages appearing on the developed film is due to one of the following reasons:

(a) the opinion of the operator that an obstruction may have existed at the instant of exposure;
(b) the opinion of the operator that a particular page may not have been completely "flat" at instant of exposure;
(c) the depression of the foot pedal trigger may have lasted too long thereby causing a second exposure to take place;
(d) the opinion of the operator that at instant of exposure a reflection or shadow may have ocurred;
(e) the opinion of the operator that at instant of exposure too much light existed in the area of filming; and,
(f) after leaving the filming in mid process the operator may have returned and losing his place had decided to film that particular page regardless of having done so previously.

Michael C. Corbett
OPERATOR

Further Explanation

The viewer of this film may take notice of several pages from each book not having been filmed. The reason for this is to conserve film and to expedite the entire process.

When a number of successive pages have been omitted it is because these pages were not printed on (without any recording materials). When this occurred the operator filmed only the first empty page after the last page with any printing on it, then, when finally coming upon the next printed page, the operator filmed the first page that was empty preceding that next printed page.
