#### ₽¥ ADAMS & HERBERT HAGERSTOWN,

Despatches from various points would seem to lend significance to the destaration which has been made that the strike on the Baltimore and Ohio was undertaken as an initial step in a general movement to include all the railroads in the country. This gives graver interest to the situation and further developments will be awaited with anxiety and impatience

General Garfield has expanded on the Ohio election, and generously set nself to teach the public as to the financial interests which will battle for mastery in the coming struggle The money war will break out in another skirmish at the ballot-box, in the great State of the West, bu after all, it will chiefly mean that the shoe of hard times pinches the foot of the people, and in their ageny they scarcely know which way to kick .-Hard times or soft times mean more to the masses than hard money or soft money, and in the need of a dollar the cry for that of the fathers mean shiefly that it is thought to be the engiest and the handlest to get at. Here you have the financial question in a nut shott. Give every laboring man enough work for (nough pay and enough pay for enough work, and h will cease to bother his mind over any questions in finance more subtle Who can do this will be the great ourrency reformer -- he and none

THE CURRANT.

The current is indeed a domestic fruit. Not oasy see its sub soid berries more agreeable to the painte, and healthful, but when made into jelly, may be almost considered; a necessity to the prudent loose wife. Let the to the prudent boars wife. Lat the jilly be once used with mutten, and we think the combination will bring such gastronomic pleasure that it will be found little trouble to remember the planting of a few bushes this ar-tume, or in the early spring. Mot-ton and jelly go together as muturally as crawberries do with turkey, or mint assess with simb. Then, the agreesable said of entrantjelly is found unseful in the preservition of various watery delithe preparation of various pastry dellacacies which the good wife takes so much pleasure in placing before the

honored guests.

The current is easily grown, but it is a mistake to think that care is not needed. You can hardly apply too much manure to your current bushes necess, 100 can sately apply two means manner to your estrant bushes for profit: The more they get, the inreger the crop, and what pleasester sight is, there than the currant bush hare of leaves, but hanging red with large bunches of the berries—lange, se, we have seen currant globes which would measure 1; inches in circumference. The Cherry, or Versailles variety, may give you this occasional size of berry, well treided.—In our garden we know that the bushes labelled Versailles average a larger bunch than the Cherry, and we think a slightly less sold. Another secret of currant growing is to use the knife freely but judiciously. Always our away the canes which show marks of away the canes which show marks of age, and lot the younget growth size their place. We know that this is good practice, and insures permanen-ey to the stop. As for infects, we do not fear them. Hellobers in a perfect remedy for the current worse, and is easily and cheaply applied. The cur-rant porce is sponewhat more difficult to manage, but a little attention to his destruction, has always with us kept destruction bes always with

destruction. This saways within within bounds. We have a prity that the garden is without this tasily raised, most agreeable, and healthy fruit. We believe that the usa of the fruit adds largely to the chances, of health in the finnity, especially when there are children. The cannes, at healt is the manify, seperally when there are delibrar. The healthings, of fruit can hearesty be over-catingled, and when fruit is fresh, there is little danger from over-cating.—Sphenetic Farmer.

CANAL AFFAIRS .- It was the current epinion yesterday that the Baltimore & Ohio strike would help the counterpart undertaking of the inland navigators at Sir John's Run, and would probably lead to some compromiss between boatmen and shippers. This theory seems to be borne out by the undisputed fact that yesterday one of our most extensive boat owners and large private shippers interviewed a number of agents with reference to baving all the companies submit a proposition to the boatmen offering 85 and 90 cents to Georgetown and Alexandria respectively; also to unite on a request to the canal company to reduce tells 5 or 10 cents, the said reduction to be given to the boatmen. thus making the rates to Georgetown and Alexandria respectively, 90 and 95 cents, or 99 cents and \$1.60, according as the canal company may concede a reduction of 5 or 10 cents.

The suggestions of the gentlemen were generally well received by the agents, and by to-morrow we may be able to chronicle a movement of this

kind taking practical shape.

It is thought that some reduction
may be made by the catal company if it is clearly guaranteed that the men will get the benefit of it.
