

INDEX

TO THE

PUBLIC LOCAL LAW.

THE Public Local Law is indexed by a reference to the page, containing the title, on which information may be sought. The marginal notes are so explicit, that if an index was to be published, it would merely be a reprint of them. It would be impracticable to bind in three volumes, (without making them of most inconvenient size) this compilation, if the marginal notes were again reprinted. The prompt reference, which is so convenient for professional men, induces the indexing of the laws relating to Baltimore city and Baltimore county court.
