

election of State Senator from Calvert county, as made out and certified to the Governor of the State, are inaccurate and erroneous, and do not represent the true and legal vote cast for State Senator in Calvert county, and that a proper and legal return of the vote cast would show a plurality for your memorialist and assigns therefor the following reasons, viz.:

(a) That Calvert county is divided into three election districts, viz.: The first, second and third, and the First District is divided into two precincts, the first or Solomon's Precinct, and the second or Saint Leonard's Precinct, making in all four voting places.

(b) That at the first or Solomon's Precinct of the First District, the returns as made out by the election officers, show a vote of one hundred and eight (108) for the said Griffith, and one hundred and five (105) for your memorialist; whereas in truth and fact the vote for the said Griffith should have been less than one hundred and eight and the vote for your memorialist should have been at least one hundred and forty-three, as a number of ballots were illegally counted for the said Griffith, the exact number your memorialist has been unable to ascertain, and at least thirty-eight legal ballots were rejected and not counted, which should have been counted for your memorialist.

(c) That the election held at St. Leonard's or the Second Precinct of the said First District was altogether illegal and void, and that for many errors, irregularities and illegal acts, as will be fully shown by the evidence to be submitted, the ballots there cast should not have been counted and, if counted, the result should not have been certified to by the judges of election, and should not have been made up in the returns certified to the Governor of the State, and should now be totally disregarded.

(d) That in the Third Election District a large number of illegal ballots were counted for the said Griffith, the exact number of which your memorialist has been unable to ascertain, and a large number of legal ballots were rejected and not counted which should have been counted for your memorialist, the exact number of which your memorialist has been un-
