

1 to each.

2 Now, to fund this, I come back now to the
3 \$340, to fund this, bear in mind you have got to have
4 \$340 times the number of students in each County, so the
5 variable is the number of students. You find out just
6 how many students there are in each County, and this re-
7 quired a judgment to be made by the State Department of
8 Education, so that we will take Prince Georges County,
9 just as an example. If there were 10,000 students in
10 Prince Georges County, then the minimum program would
11 be \$3,400,000 for that particular County, which would be
12 State guaranteed. Some of that money has to be raised
13 locally, as stated in the text, but that is the State
14 guarantee that there will be that much money going into
15 Prince Georges County, and if it can't be raised locally
16 through the real estate tax and so on, then the State
17 is going to put up the difference. Now, what happens is
18 this: That in the fall of the year, the State Department
19 of Education determines what the State minimum program
20 is to be or will be in each of the political subdivisions,
21 and when that is determined, the people in the State
