This Institution has been in existence for sixteen years, and during that period has received the most liberal patronage from the City of Baltimore and all parts of the State of Maryland, it has also extended its influence to Pennsylvania Delaware, Virginia, North Carolina and Georgia.

Located in one of the most salubrious parts of the city, suitably furnished with costly and extensive apparatus, government rigid yet kind and parental, ten competent teachers in their various departments of instruction, the building not only commodious but classically beautiful, TWENTY THOUSAND DOLLARS having been expended in erecting and furnishing them, it is therefore hoped that nothing will be found wanting necessary to the happiness or progress of the pupil.

Any other information may be obtained on application to the President, by letter or otherwise.
